

Awareness Watch™ Newsletter

By Marcus P. Zillman, M.S., A.M.H.A.

<http://www.AwarenessWatch.com/>

V2N12

December 2004

Welcome to the V2N12 December 2004 issue of the **Awareness Watch™ Newsletter**. This newsletter is available as a complimentary subscription and will be issued monthly. Each newsletter will feature the following:

Awareness Watch™ Featured Report
Awareness Watch™ Spotters
Awareness Watch™ Book Review
Subject Tracer™ Information Blogs

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that “change” is the only thing that will remain constant!!

Awareness Watch™ Featured Report

This month’s featured report will be highlighting data mining resources for current and competent information on the Internet. These internet data mining resources are constantly updated with Subject Tracer™ bots at the following URLs:

<http://www.DataMiningResources.info/>

Finding the appropriate data mining resources on the Internet is one of the most important tasks a researcher can accomplish! This December 2004 Awareness Watch Featured Report list many of these resources along with a number of extremely comprehensive lists of online data mining sources. These resources are constantly being updated so it would be wise to bookmark this resource and return on a regular basis.

LibWeb - Library Servers via WWW

<http://sunsite.berkeley.edu/Libweb/>

Libweb - Library Servers via WWW is updated daily at midnight, Pacific Time. Libweb currently lists over 7100 pages from libraries in over 115 countries. An excellent current resource for discovering libraries from through the world! This has been added to [Reference Resources](#) Subject Tracer™ Information Blog.

Custom eBay Searches Delivered by RSS

<http://www.rssauction.com/>

Custom eBay searches delivered by RSS brought to you by Lockergnome and BidRobot. Simple as 1/2/3 (1) Complete the form to your satisfaction, (2) Press the 'Search' button or tap your Enter key, and (3) Subscribe to or syndicate the resulting RSS URL! Also a nice list of feeds already created for the most popular categories of eBay. This has been added to [Auction Resources](#) Subject Tracer™ Information Blog.

AskMars

<http://www.AskMars.com/>

According to the legend, Romans used to consult the God Mars in order to obtain advice in how to act in life. Based on the legend they have created AskMars, a new way to help people find the right answers to their questions. Using their unique knowledge-sharing-process, their mission is to create a widespread community of users that can help each other in finding solutions to their problems, doubts or questions. This has been added to [Internet Experts](#) Subject Tracer™ Information Blog.

Drupal.org

<http://www.Drupal.org>

Drupal.org is the official website of Drupal, an open source content management platform. Equipped with a powerful blend of features, Drupal can support a variety of websites ranging from personal weblogs to large community-driven websites. A dynamic web site platform which allows an individual or community of users to publish, manage and organize a variety of content, Drupal integrates many popular features of content management systems, weblogs, collaborative tools and discussion-based community software into one easy-to-use package. As an open source software project maintained and developed by a community, Drupal is free to download and use. This has been added to my [Bots, Blogs and News Aggregators](#) presentation site.

Email Security Testing Zone

<http://www.emailsecuritytest.com/>

Awareness Watch V2N12 December 2004 Newsletter

<http://www.AwarenessWatch.com/>

zillman@VirtualPrivateLibrary.com

© 2004 Marcus P. Zillman, M.S., A.M.H.A.

GFI Email Security Testing Zone checks whether your email system is vulnerable to email viruses, worms and other threats such as emails with potentially harmful attachments with VBS and CLSID extensions, emails with malformed MIME headers, HTML mails with embedded scripts and more. Includes Outlook 2002 and ActiveX vulnerability tests. This online test is free of charge. This has been added to [Internet Hoaxes](#) Subject Tracer™ Information Blog under Anti-Vandal, Computer and Network Security Resources section.

Snapshots of Science and Medicine

<http://science.education.nih.gov/newsnapshots/index.html>

Welcome to Snapshots of Science and Medicine. Snapshots is a creation of the [Office of Science Education](#) of the [National Institutes of Health \(NIH\)](#) in Bethesda, Md. The effort is funded by the [NIH Office of Research on Women's Health](#). Today, biological science--both basic research and clinical application--is booming like never before. And with so much happening in biology and medicine, science students and teachers need a vehicle for bringing the world of biological research into their science classrooms. Snapshots was created to be that vehicle. This has been added to [Student Research](#) Subject Tracer™ Information Blog.

National Cyber Security Alliance (NCSA)

<http://www.staysafeonline.info/>

The National Cyber Security Alliance (NCSA) is a public-private partnership focused on promoting cyber security and safe behavior online. We drive awareness and response to pressing cyber security issues; providing tools and resources to empower home users, small businesses, as well as schools and universities to stay safe online. This website gives you the information needed to secure your computer. You'll find tips on how to safeguard your system, a self-guided cyber security test educational materials and other Internet resources, as well as valuable information from our supporting organizations. This will be added to [Security Resources 2005](#) Internet MiniGuide.

Web Collaborator

<http://webcollaborator.com/>

This website creates a new free and easy way to collaborate. Before Web Collaborator, to collaborate on a project meant passing papers back and forth, hours of painstaking corrections, hundreds of wasted pieces of paper, headaches, and plenty of coffee. Web Collaborator coordinates collaborations automatically, keeping backups of every revision ever made to the project, letting you see who made the changes, and allowing you to focus on the work instead of managing the work. Better yet, it is absolutely free for all uses. Each project has three components: 1) The Discussion, 2) The Project, and 3) The

Awareness Watch V2N12 December 2004 Newsletter

<http://www.AwarenessWatch.com/>
zillman@VirtualPrivateLibrary.com

© 2004 Marcus P. Zillman, M.S., A.M.H.A.

History. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

People-Finding Guide

<http://lib.law.washington.edu/ref/people.html>

The People-Finding Guide prepared by Ann Hemmens of the Marion Gould Gallagher Law Library University of Washington does an excellent job of listing a number of relevant resources for finding people. Sections include: 1) Locating a Lawyer, 2) Locating A Government Official or Employee, 3) Locating a Law School Faculty Member, 4) Locating Corporate Counsel and 5) Locating a Person or Business Online. This has been added to [Finding People](#) Subject Tracer™ Information Blog.

Google Help : Cheat Sheet

<http://www.google.com/help/cheatsheet.html>

A neat one page printable Google cheat sheet (from Google) covering various Google operator examples, calculator operators and advanced operators to make your searching of Google more focused with better results. A nice sheet to place next to your computer or laptop!

SWISH-E

<http://swish-e.org/>

SWISH-E (Simple Web Indexing System for Humans - Enhanced) is a fast, powerful, flexible, free, and easy to use system for indexing collections of Web pages or other files. See the article [How to Index Anything](#) by Josh Rabinowitz in the Linux Journal for more information. This will be added to the search engines section of all the [2005 Internet MiniGuides](#).

Collaborative Live Reference Services

<http://www.lis.uiuc.edu/~b-sloan/collab.htm>

This is a listing of collaborative live reference services, i.e., real-time reference services offered by two or more libraries by Bernie Sloan. He has attempted to list the services in alphabetical order by sponsoring organization. If there is no one sponsoring organization, the service is listed alphabetically by the name of the service. Excellent resource for collaborative live reference services! This has been added to [Reference Resources](#) Subject Tracer™ Information Blog.

Webmatic

http://freshmeat.net/projects/webmatic/?branch_id=34763&release_id=177425

Webmatic is a system for dynamically creating a Web site directly on-line. The webmatic

Awareness Watch V2N12 December 2004 Newsletter

<http://www.AwarenessWatch.com/>
zillman@VirtualPrivateLibrary.com

© 2004 Marcus P. Zillman, M.S., A.M.H.A.

control panel makes it possible to manage the entire contents of a Web site without knowing any kind of programming language or HTML language. With Webmatic you can create and manage a newsletter, create and manage a FAQ section, create a page with the horoscope, create and manage a search engine, create a page for user registration, differentiate the access levels for each user, manage up to 9 advertising banners easily, create a multi-language Web site with a panel for quickly changing the language, and change the site's graphical theme, detailed statistics for your Web site. You can also create your own ecommerce website with products catalog.

Scout Portal Toolkit (SPT)

http://freshmeat.net/projects/spt/?branch_id=31976&release_id=177620

The Scout Portal Toolkit (SPT) is a turnkey software package that allows groups or organizations who have collections of knowledge or resources they want to share via the Web to put that collection online without a big investment in technical resources. It includes keyword and fielded search engines, a recommender system, a metadata editor, user agents (push technology to notify users of new resources), forums (bulletin boards), resource quality ratings, resource annotations by users, and support for multiple dynamic user interfaces, selectable on a per-user basis. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Memes Links by Susan Blackmore

<http://www.susanblackmore.co.uk/memetics/links.htm>

There are lots of websites dealing with memes but many are completely confusing, some downright misleading, and some total rubbish. Susan Blackmore has listed here those that she finds useful, roughly in the order in which she would recommend them to people who want to learn about the scientific study of memes and the field of memetics.

LINKPENDIUM - A 1,109,200 Link Directory of Genealogical Resources

<http://www.linkpendium.com/>

An excellent resource and link directory compilation of a million plus resources for genealogy by Karen Isaacson and Brian Leverich, founders of the extremely popular [RootsWeb](#) genealogical community site. This has been added to [Genealogy Resources](#) Subject Tracer™ Information Blog.

Most-Cited Legal Periodicals - U.S. and Selected Non-U.S.

<http://law.wlu.edu/library/research/lawrevs/mostcited2004.asp>

The most-cited list of periodicals, which currently covers the period 1996-2003, is in the process of being updated for 1997-2004. Journals will be added alphabetically in the sequence of general-U.S. [completed], general-non-U.S. [completed], specialized-U.S. [completed], and specialized-non-U.S. For the moment the impact-factor calculation will

continue to be based on the number of articles published during 1996-2002 as it's time-consuming to re-calculate the figure. This will be added to [Legal Resources 2005](#) Internet MiniGuide.

The Scientific Article Search and Order Engine

<http://articlesciences.inist.fr/>

A service provided by INstitut de l'Information Scientifique et Technique of Centre National de la Recherche Scientifique. To improve your search do not hesitate to utilize foreign language equivalent for the words your initially entered. The Institute of Scientific and Technical Information (INIST) is a service unit of the French National Center for Scientific Research (CNRS). Its mission is to collect, process and analyze the results of worldwide scientific research for dissemination to the research, academic and industrial communities at large. INIST, the leading French scientific and technical document center, also produces multilingual and multidisciplinary bibliographic databases covering the core international scientific literature. By using state of the art technology for information storage, processing and dissemination, INIST has acquired the cutting edge knowhow needed for developments in new information and communication technology. Today, with Articlesciences, INIST reaches out to the international public at large. • Articlesciences covers the major fields of international research: 1) Biological Sciences, 2) Applied Mathematics, 3) Social Sciences, 4) Medical Sciences, 5) Physics, 6) Humanities, 7) Earth Sciences, 8) Chemistry, 9) Economics - Management, 10) Applied Sciences, 11) Environmental Sciences, and 12) Information Science. This has been added to [Academic Resources 2005](#) Internet MiniGuide. This will be added to the search engine section of all the [2005 Internet MiniGuides](#).

FeedFinder

<http://www.feedster.com/feedfinder.php>

Need to find a Feed? The FeedFinder can help, letting you search their database of almost 900,000 different feeds. Just put in whatever you know about it -- part of the description, the author's name, the url to a site or even the domain. This has been added to the search engine section of all the [2005 Internet MiniGuides](#). This also has been added to the sources of my [Bots Blogs and News Aggregators](#) presentation.

T2K - Text to Knowledge

<http://alg.ncsa.uiuc.edu/do/tools/t2k>

Knowledge discovery is the process of uncovering relationships in data previously unknown and extracting this knowledge from the data. Even using current data mining methods, understanding these data relationships can be a difficult task. Data stores in any given problem area are often huge, forcing decision-makers to construct complex queries to reflect the multiple dimensions of their problem domain. These decision-makers would benefit from tools that help highlight potential "information nuggets" and that help in the

Awareness Watch V2N12 December 2004 Newsletter

<http://www.AwarenessWatch.com/>

zillman@VirtualPrivateLibrary.com

© 2004 Marcus P. Zillman, M.S., A.M.H.A.

formation of the complex queries. Often, a large percentage of these data stores is in the form of text. The T2K (Text to Knowledge) tool provides text mining and analysis capabilities that have been specially designed to operate in and capitalize upon the complexity of rich natural language domains of very large stores of text and multimedia documents. T2K is a library of D2K modules that implements sophisticated algorithms for text analysis. This has been added to [Data Mining Resources](#) Subject Tracer™ Information Blog. This has been added to [Knowledge Discovery](#) Subject Tracer™ Information Blog.

Fluid Dynamics Search Engine (FDSE)

<http://www.xav.com/scripts/search/>

FDSE is an easy-to-install search engine for local and remote sites. It returns fast, accurate results from a template-driven architecture. Freeware and shareware versions are available with Perl source. Latest stable version 2.0.0.0072 released April 4, 2004. This will be added to the search engines section of all [2005 Internet MiniGuides](#).

CodeHound - The Software Developer's Search Engine

<http://www.codehound.com/>

Launched in February 2000, CodeHound has steadily become one of the most popular Web destinations for software developers around the world. Unlike other Internet search engines, CodeHound is specifically designed for programmers. Instead of using a larger search engine like Google or AltaVista, a CodeHound user comes to CodeHound, selects a programming language, and lets CodeHound search the best Web sites and newsgroups dedicated to that language. Their search results are always relevant and up-to-date. Not only does CodeHound target their users' search results to specific Web site, but they also categorize their users' search results. For example, a search on our SQL search engine is categorized by RDMS: SQL Server, Oracle, IBM DB2, Informix, Sybase, Microsoft Access, MySQL, and others. No other search engine on the Internet offers such power. This has been added to [Script Resources](#) Subject Tracer™ Information Blog.

kdissert - Mind Mapping Tool

http://freshmeat.net/projects/kdissert/?branch_id=42508&release_id=178253

kdissert is a mind-mapping tool to help students write texts such as dissertations, theses, and reports. It features both a mindmap view and a linear view, and several document generators (LaTeX text and slides, OpenOffice.org writer, HTML, and plain text). This has been added to [Student Research](#) Subject Tracer™ Information Blog.

KSG Research Working Papers Series

http://www.ksg.harvard.edu/research/working_papers/

The Harvard University's John F. Kennedy School of Government Faculty Research

Awareness Watch V2N12 December 2004 Newsletter

<http://www.AwarenessWatch.com/>

zillman@VirtualPrivateLibrary.com

© 2004 Marcus P. Zillman, M.S., A.M.H.A.

Working Paper Series provides an electronic database to disseminate works-in-progress reflecting the broad range of research activities of Kennedy School faculty members. You may search the database, view abstracts of papers, and download the full text of papers in Adobe Acrobat PDF format. In addition to the Faculty Research Working Papers Series, the Kennedy School has a wide variety of working papers and other publications available through individual research centers and programs. The KSG Faculty Research Working Papers Series is intended to complement and highlight these other important research outlets. This has been added to [Research Resources](#) Subject Tracer™ Information Boog. This will be added to [Academic Resources 2005](#) Internet MiniGuide.

CyberTimes Navigator

<http://tech.nytimes.com/top/news/technology/cybertimesnavigator/>

Navigator is the home page used by the newsroom of The New York Times for forays into the Web. Its primary intent is to give reporters and editors new to the Web a solid starting point for a wide range of journalistic functions without forcing all of them to spend time wandering around blindly to find a useful set of links of their own. Its secondary purpose is to show people that there's still a lot of fun and useful stuff going on out there. The list is by its nature highly selective and constantly changing. Areas included: Net Search, Journalism, Reference, Directories, Publications, Politics, New York Region, Commerce, Travel, Entertainment, Sports, and Miscellany. This has been added to the [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Reference Resources](#) Subject Tracer™ Information Blog. This will be added to the reference section of all the [2005 Internet MiniGuides](#).

Google Scholar

<http://scholar.google.com/>

Google Scholar enables you to search specifically for scholarly literature, including peer-reviewed papers, theses, books, preprints, abstracts and technical reports from all broad areas of research. Use Google Scholar to find articles from a wide variety of academic publishers, professional societies, preprint repositories and universities, as well as scholarly articles available across the web. Just as with Google Web Search, Google Scholar orders your search results by how relevant they are to your query, so the most useful references should appear at the top of the page. This relevance ranking takes into account the full text of each article as well as the article's author, the publication in which the article appeared and how often it has been cited in scholarly literature. Google Scholar also automatically analyzes and extracts citations and presents them as separate results, even if the documents they refer to are not online. This means your search results may include citations of older works and seminal articles that appear only in books or other offline publications. This will be added to [Academic Resources 2005](#) Internet MiniGuide. This has been added to [Research Resources](#) Subject Tracer™ Information Blog. This has also been added to [Deep Web Research](#) Subject Tracer™ Information Blog.

EIN Finder

<http://www.freerisa.com/Extras/EINFinder.asp?mode=SEARCH>

Find the employer tax identification number you need. Nearly 5 million! Also allows you to search the entire site by EIN (Employer Identification Number) Number. Every user gets three FREE searches. Additional searches are available through a Premium subscription. This has been added to [Business Intelligence](#) Subject Tracer™ Information Blog. This will be added to [Business Resources 2005](#) Internet MiniGuide.

EduHound

<http://www.EduHound.com/>

EduHound (Division of ETC Group LLC), is a highly specialized educational directory with built-in resource links offered free to educators, students and parents. EduHound.com seeks to harness the vast information resources of the Web, while enabling educators to use the Internet as a classroom tool. Since its launch in January 2000, the site boasts thousands of visitors per week and an ever-growing list of subscribers to their weekly newsletter, EduHound Weekly. This has been added to [Directory Resources](#) Subject Tracer™ Information Blog and [Education and Distance Learning Resources 2005](#) Internet MiniGuide.

Endeca

<http://www.endeca.com/>

“Endeca has award-winning infrastructure software for information delivery that revolutionizes the way users search, navigate and analyze enterprise data. Endeca Search and Guided Navigation, powered by the Endeca Navigation Engine, expose the full richness and potential of large data sets by allowing users to explore knowledge bases, intranets, information portals, catalogs and other data stores with tremendous speed, precision and certainty.” This has been added to [Deep Web Research](#) Subject Tracer™ Information Blog. [Internet Resources Newsletter [Issue 122](#)]

Bibliophile

<http://bibliophile.sourceforge.net/>

Bibliophile is an initiative to align the development of bibliographic databases for the web. It aims to promote standards, discussion among users on necessary features and a variety of specific solutions for different fields of research. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

IM Smarter™

<http://www.imsarter.com/>

IM Smarter™ is a new kind of instant messaging enhancement. IM Smarter empowers all

Awareness Watch V2N12 December 2004 Newsletter

of the major messaging services with a rapidly expanding set of cool, new features. It's not a "bot". It's not a plugin for AIM. It's not a program that you run instead of your existing IM client. Using IM Smarter can be understood as hiring a secretary for your IM; IM Smarter, like a secretary, sits between you and the rest of the world and helps you manage your messages. Using IM Smarter is pretty cool; imagine having one place you can search and visualize your instant message chats with anyone you've chatted with using any of the major IM networks. Imagine being able to update your blog as easily as sending an IM, and getting an IM whenever any of your buddies update their blogs. IM Smarter keeps you in the loop with things that you told it to remember and things you told it to keep an eye out for. Nearly all modern instant messaging clients have the ability to "proxy", or to connect to the official servers by way of another server. This is usually only used in very fancy corporate environments; most home users don't use a proxy. To use IM Smarter, all you have to do is to tell your IM client to use our servers as your "proxy" and you're all set! With our autoconfiguration available for AIM, Yahoo, and MSN, you can be ready to go in seconds! [Robin Good](#) has an excellent review of IM Smarter and his review is available by clicking [here](#).

Life Begins at Eighty ... On the Internet

<http://www.bdb.co.za/shackle/>

Eric Shackle's eBook: Late in 2000, an Australian writer and a South African computer expert, who had first met on the Internet, combined talents to publish what they believe is the world's first multi-national electronic book. Now they have discovered, to their surprise, that they were both born in Essex - in different generations. The free eBook, "Life Begins at Eighty ... On the Internet" by veteran Sydney journalist Eric Shackle, can be found on Barry Downs's Kimberley Web site, listed above, linked to other sites in the United States, England, Scotland, Australia and Bangladesh. Articles from the various sites cover a wide range of topics: the world's biggest turkey and largest hailstones, computer-generated anagrams, mysterious lights in Texas and Queensland, 15 towns named Rugby, Global English, and how to cultivate a herb said to ease arthritic pains. This is very well worth the read not only for elders but for all those interested in many current and exciting happenings on the Internet! This has been added to [Elder Resources](#) Subject Tracer™ Information Blog.

Insurance Research Resources

<http://www.iso.com/links/>

[ISO](#) is the premier source of information for and about the property/casualty insurance industry. But insurance is a complex topic, and many organizations have valuable data and interesting points of view. That's why they are pleased to offer this classified list of links for people doing research on insurance and related topics. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

repute to attract an international visibility and reputation for Australia as the leading expert in Asia-Pacific Studies. The ANU has commenced appointing staff for the Centre which is temporarily co-located with the National Institute for Asia and the Pacific in the Menzies Library where the ANU has its major Asia Pacific collections. The new Director, Professor John Fitzgerald, will take up his position in mid January, 2005. This website provides introductory information on the Centre, its objectives and plans. Preliminary guidelines for project funding are provided and proposals that meet the broad criteria are called for. This has been added to [Reference Resources](#) Subject Tracer™ Information Blog.

Business Reference Services - Indexes, Bibliographies, and Guides

<http://www.loc.gov/rr/business/>

The Business Reference Services of the Library of Congress offers Indexes, Bibliographies, and Guides including Guide to Finding Business Information at the Library of Congress, Specialized Business Guides, Subscription Databases for Business and Economics Research, and Subject Guides to Internet Resources. Well worth the visit as an excellent business research resource. This will be added to [Business Resources 2005](#) Internet MiniGuide and has been added to [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Reference Resources](#) Subject Tracer™ Information Blog.

Science Commons

<http://science.creativecommons.org/>

Science Commons is a new project of Creative Commons and will launch on January 1, 2005. The mission of Science Commons is to encourage scientific innovation by making it easier for scientists, universities, and industries to use literature, data, and other scientific intellectual property and to share their knowledge with others. Science Commons works within current copyright and patent law to promote legal and technical mechanisms that remove barriers to sharing. This has been added to [Deep Web Research](#) Subject Tracer™ Information Blog, [Research Resources](#) Subject Tracer™ Information Blog and [Academic Resources 2005](#) Internet MiniGuide.

EEVL's Ejournal Search Engines

<http://www.eevl.ac.uk/eese/eese-eevl.html>

Search the content of over 250 freely available full-text [ejournals](#), selected for relevance and quality. Academic journals, professional and trade publications, and Society journals are covered. All sites are also listed in the [EEVL catalogue of Internet Resources](#). This has been added to [Research Resources](#) Subject Tracer™ Information Blog, [Deep Web Research](#) Subject Tracer™ Information Blog and [Academic Resources 2005](#) Internet MiniGuide. Mooter Search

<http://www.mooter.com/>

The Mooter Search Engine employs artificial intelligence based on psychological modelling to process and understand the information users seek. Mooter analyses the choices you make while searching, then reorders the results based on what you are actually looking for at that moment without you having to go back and rephrase your exact needs. So instead of giving users long lists of scrambled results, Mooter displays simple, sensible categories of information. As users search, the algorithms shuffle the results in the background, ensuring that more relevant results are displayed. Mooter Search is the leading provider of intelligent clustering, search and media personalization software. Millions of searchers, including consumers, businesses, government agencies and academia, use Mooter's clustering technology to better organize and navigate massive amounts of information. Mooter has pioneered search result clustering and now provides enterprise customers a visually intuitive way to navigate through sometimes very confusing amounts of information. Mooter also provides personalization technology to media publishers and advertisers without profiling; enabling them to target audiences based on their behaviors and not just which pages they visit. This enables them to provide highly relevant advertising to their target audience no matter what. The result? No more ad impressions wasted on the wrong audience, and a greater return on advertising dollars. Mooter serves its global client base from its headquarters in Sydney, Australia, and partners throughout the world. This has been added to [Deep Web Research](#) Subject Tracer™ Information Blog and to the search engine section of all [2005 Internet MiniGuides](#).

December 2004 Zillman Column - Holiday Shopping: ShoppingBots and Virtual Malls

[http://virtualprivatelibrary.blogspot.com/Holiday Shopping Dec04 Column.pdf](http://virtualprivatelibrary.blogspot.com/Holiday%20Shopping%20Dec04%20Column.pdf)
<http://www.zillmancolumns.com/>

The December 2004 Zillman Column is now available and is titled **Holiday Shopping: ShoppingBots and Virtual Malls**. This December 2004 Zillman Column is a comprehensive list of shopping resources and sites on the Internet. I have been writing about and listing various shopping resources and tools to be used on the Internet since 1995 and this continues my tradition. Download this excellent 18 page free .pdf (356KB) column today and shop with your bot til you drop!

Advanced Bash Scripting Guide

<http://www.tldp.org/LDP/abs/html/>

http://freshmeat.net/projects/advancedbashscriptingguide/?branch_id=130&release_id=179011

The Advanced Bash Scripting Guide by Mendel Cooper is both a reference and a tutorial on shell scripting. This freely available comprehensive book (the equivalent of about 612 print pages) covers almost every aspect of shell scripting. It contains 300 profusely commented illustrative examples (including such goodies as an anti-spammer script), and a number of tables. Not just a shell scripting tutorial, this book also provides an introduction to basic programming techniques, such as sorting and recursion. It is well suited for either individual study or classroom use. This tutorial assumes no previous knowledge of scripting or programming, but progresses rapidly toward an intermediate/advanced level of instruction . . . all the while sneaking in little snippets of UNIX® wisdom and lore. It serves as a textbook, a manual for self-study, and a reference and source of knowledge on shell scripting techniques. The exercises and heavily-commented examples invite active reader participation, under the premise that the only way to really learn scripting is to write scripts. This has been added to [Script Resources](#) .

Awareness Watch™ Paper Review

Web Data Extractors by Marcus P. Zillman, M.S., A.M.H.A.

<http://zillman.blogspot.com/2004/09/web-data-extractors.html>

This white paper link compilation was updated November 15, 2004 and is a comprehensive resource listing resources and sources on the Internet for web data extraction. It is a freely available 12 page .pdf document (535KB).

Extracting data from the World Wide Web (WWW) has become an important issue in the last few years as the number of web pages available on the visible Internet has grown to over eight billion pages with over 500 billion pages available from the invisible web. Tools and protocols to extract all this information have now come in demand as researchers as well as web browsers and surfers want to discovery new knowledge at an ever increasing rate! As robots (bots) and intelligent agents are at the heart of many extraction tools I decided to create a compilation of the latest sources and sites that extract information from the web. There are a number of eMail extraction tools still available through the Internet and I have decided not to list these as they aid to the on-going and increasing problem of SPAM except for a readily available Google™ Directory listing
