

Awareness Watch™ Newsletter

By Marcus P. Zillman, M.S., A.M.H.A.

<http://www.AwarenessWatch.com/>

V2N4

April 2004

Welcome to the V2N4 April 2004 issue of the **Awareness Watch™ Newsletter**. This newsletter is available as a complimentary subscription and will be issued monthly. Each newsletter will feature the following:

Awareness Watch™ Featured Report

Awareness Watch™ Spotters

Awareness Watch™ Book Review

Subject Tracer™ Information Blogs

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that “change” is the only thing that will remain constant!!

Awareness Watch™ Featured Report

This month's featured report will highlight selected sources for Research Resources. The below list of sources is taken from my Subject Tracer™ Information Blog titled Research Resources and is constantly updated with Subject Tracer™ bots from the following URL:

<http://www.ResearchResources.info/>

zillman@VirtualPrivateLibrary.com

© 2004 Marcus P. Zillman, M.S., A.M.H.A.

An Introduction to Internet Mailinglist Research

<http://www.irene-langner.de/docs/19990917/trier199909.html>

This paper is intended as a practice oriented introduction to Internet mailinglists as research material for German researchers in Japanese Studies who have little previous experience with online material. After some general remarks about mailinglists they mention new opportunities as well as limitations when dealing with mailinglists as research sources and present some current approaches to mailinglist research, with a focus on examples from social and culture studies. This is an older document but still maintains some very pertinent points for doing research within mailinglist and Listservs®. Another excellent resource from the Virtual Chase is titled: Listserv Tips and Other Research Tricks and is available by clicking [here](#).

MailBucket

<http://www.mailbucket.org/>

MailBucket is an experiment in alternative methods of email management. For now its only feature is a public email-to-RSS gateway. The service is probably most useful to those who lurk on high-traffic mailing lists, but it could also be used as a rudimentary bridge between applications, with email as the transfer protocol. The generated RSS feeds are valid and compressed (if your client supports compressed content); they are also public and impermanent, which may be a disadvantage for some.

Triple Bottom Line Taxonomies

<http://www.montague.com/review/tbllinks.htm>

The above is a list of selected taxonomies for triple bottom line — also called sustainable development — reporting.

News Search Portal

<http://www.newssearchportal.com/>

A very comprehensive and up to date portal that offers News Search sites on the Internet. This excellent news search portal created and maintained by Wim Wylin has been added to [Directory Resources](#) Subject Tracer™ Information Blog.

Open Channel Foundation - Publishing Software from Academic and Research Institutions

<http://www.openchannelsoftware.org/>

The concept for Open Channel Software was developed in early 1999 by Douglas Curry in collaboration with Professors Stuart Kurtz and Ridgway Scott, both on the faculty of the University of Chicago. These individuals saw the need for a new mechanism to efficiently publish software from the university while allowing for the commercialization of the most promising programs. They developed the idea of a separating the publishing entity from the commercialization process by creating a non-profit organization (Open

zillman@VirtualPrivateLibrary.com

© 2004 Marcus P. Zillman, M.S., A.M.H.A.

Channel Foundation) devoted to publication and community building. The parent company, Open Channel Software, handles the commercialization process.

Free Online Full-text Articles

<http://highwire.stanford.edu/lists/freart.dtl>

Free Online Full-text Articles (List limited to journals published online with the assistance of HighWire Press). [HighWire Press](#) is the [largest archive](#) of free full-text science on Earth! As of yesterday (3-02-04) they are assisting in the online publication of 696,374 free full-text articles and 1,726,362 total articles. A truly excellent resource! They have been added to [Academic Resources](#) 2004 Internet MiniGuide.

Yahoo! Crawls Deep Into the Web

<http://snipurl.com/4u7k>

Yahoo! is hoping that it can exploit a weakness of Google's by burrowing deep into the Web to offer more content to surfers. The online portal announced its Content Acquisition Program, in which it will index billions of records in public databases. Yahoo! is also offering paid inclusion services to businesses, allowing them to pay a fee to be included in search results. Yahoo is trying to "get it" when it comes to the Deep Web. Those interested in the latest deep web resources need to visit my Subject Tracer™ Information Blog [Deep Web Research](#). Also my latest article on Deep Web Searching is at [LLRX.com](#) and available by clicking [here](#).

Hot Paper Topics

<http://library.sau.edu/bestinfo/hot/hotindex.htm>

[O'Keefe Library's](#) Best Information on the Net Hot Paper Topics. This listing is constantly updated and expanded with the latest hot paper topics from their resources of best information on the Internet. This has been added to [Student Research](#) Subject Tracer™ Information Blog.

Searching the Internet

<http://www.SearchingTheInternet.info/>

SearchingTheInternet.info is a resource created by [Marcus P. Zillman, M.S., A.M.H.A.](#) highlighting many of the resources and sources that are used to search the Internet. These resources include his latest Subject Tracer™ Information Blogs as well as his recent white papers and articles on knowledge discovery, current awareness happenings and deep web research. Also additional searching resources that include his free columns, newsletters and links.

Genome Browsers

Genome Browsers are available for viewing genomic sequence and its annotation. The annotation includes: Genes, EST clusters, SNPs, diseases, and others linked to a

zillman@VirtualPrivateLibrary.com

© 2004 Marcus P. Zillman, M.S., A.M.H.A.

particular genomic region or sequence. The major resources for browsing genomic sequences are:

Ensembl Genome Browser

<http://www.ensembl.org/>

Human Genome Browser Gateway

<http://snipurl.com/4wsc>

NCBI Map Viewer

<http://www.ncbi.nlm.nih.gov/mapview/>

This has been added to [Biological Informatics](#) Subject Tracer™ Information Blog.

IPS-Inter Press Service – the Global Gateway

<http://www.ipsnews.net/>

Inter Press Service News Agency (IPS), the world's leading provider of information on global issues, is backed by a network of journalists in more than 100 countries. Its clients include more than 3,000 media organizations and tens of thousands of civil society groups, academics, and other users. IPS focuses its news coverage on the events and global processes affecting the economic, social and political development of peoples and nations. This will be added to [Business Resources 2004](#) and [International Trade Resources 2004](#) Internet MiniGuides.

Trackle

<http://www.trackle.com/index.cgi>

TRACKLE(beta)... Tracks ("trackles") Web pages for content changes, up to 24 times a day. Excerpts, combines and emails you changes in easy-to-read plain text format while preserving links (useful for following blogs). Trackle (beta) was created by [Marc Fest](#) because similar services didn't quite do what he was looking for. Marc has also created the following excellent solutions:

[Quickbrowse.com](#): Combine your frequently viewed Web pages into a single page for faster browsing.

[OnlineHomeBase.com](#): Reminders, online file storage, collaborations, with an interface as simple as a sheet of paper.

[myHerald.com](#): View the entire Miami Herald on a single page, or as it appears in print.

[MagicMinder.com](#): Use the power of randomness to never lose touch with friends.

[OurNotepad.com](#): A Web-based collaboration tool that looks and works like a notepad.

zillman@VirtualPrivateLibrary.com

© 2004 Marcus P. Zillman, M.S., A.M.H.A.

Sideissue.com: Articles on making life simpler and funner using the Net.
I will be adding Trackle to my [eCurrent Awareness Resources 2004](#) Report.

SourceSeries Internet Research Workshops

<http://www.SourceSeries.com/>

SourceSeries Internet Research Workshops by [Marcus P. Zillman, M.S., A.M.H.A.](#) are now available on the following subjects as one day workshops. These research and business intelligence workshops offer both the newbie to the Internet as well as the seasoned Internaut the latest Internet research sources to stay current and to keep ahead of your competition.

- 1) Advertising, Marketing and Public Relations Research Sources on the Internet.
- 2) Articles, Abstracts, Documents, Papers, Reports, and Literature Research Sources on the Internet.
- 3) Business Research Sources on the Internet.
- 4) Competitive Intelligence Research Sources on the Internet.
- 5) Education and Distance Learning Research Sources on the Internet.
- 6) Healthcare Research Sources on the Internet.
- 7) International Trade Research Sources on the Internet.
- 8) Legal Research Sources on the Internet.
- 9) Security Research Sources on the Internet.

The typical one day workshop schedule is as follows:

8:45 - 9:00 Introduction and Overview of the Internet Research Workshop.
9:00 - 10:00 Historical perspectives of the Internet to current day happenings.
10:00 - 10:15 Online live examples of above .
10:15 - 10:30 Coffee Break - CyberBreak
10:30 - 12:00 Listserv®, NewsGroups, Chat Channels, Bulletin Boards, Forums, Blogs, News Aggregators, Intelligent Agents and Bots .
12:00 - 1:15 Lunch Break (On Your Own)
1:15 - 1:45 Online live examples continued .
1:45 - 2:30 Online examples of the workshop "Sources".
2:30 - 2:45 Coffee Break - CyberBreak
2:45 - 3:45 Tools necessary to build Business Intelligence including Browser ToolKit and Searcher ToolKit to discover additional 2004 resources.
3:45 - 4:30 Current Awareness Resources and what the future holds....
4:30 - 5:00 Question and Answers

For additional information including upcoming dates and locations, registration or partnering an upcoming SourceSeries Workshop, please contact us by clicking [here](#).

zillman@VirtualPrivateLibrary.com

© 2004 Marcus P. Zillman, M.S., A.M.H.A.

Business Schools Directory

<http://www.businessschools.com/>

Nearly 1,600 listings are searchable in this directory of business schools. Search criteria are location, specialty (such as accounting, e-commerce, logistics, etc.), and degree level. A school name search is also available. Listings give a sampling of the areas of study offered at the school and contact information (physical address, phone numbers, website, and email). This will be added to [Business Resources 2004](#) Internet MiniGuide.

The Scannery

<http://www.thescannery.com>

The Scannery is "an investor focused web search platform that only searches the websites of publicly traded companies from around the world." The websites of 12,000 companies can be searched from The Scannery. Standard keyword search is augmented with options to search companies in a specific country and industry, as well as with fuzzy logic and syntactical devices such as stemming. Results can be consolidated and search returns grouped by company. Companion site TimBukOne allows searching of specific companies, but requires free registration. This will be added to [Business Resources 2004](#) Internet MiniGuide as well as [Business Intelligence](#) Subject Tracer™ Information Blog.

ALT Codes

<http://www.coloryourprofyle.com/phade/alt.html>

ALT Codes are special characters such as $\grave{\text{c}}$ © « ¤. Because your keyboard doesn't have all the keys it needs, you use the ALT key and your number pad. Don't use your the numbers on top, this only works with keypad off the the right, and make sure "NUM LOCK" is on. EXAMPLE: to make this symbol: $\grave{\text{c}}$ CODE: ALT-0191 Hold ALT KEY down and press 0191 on the Number Pad

EconData.Net

<http://econdata.net/>

EconData.Net is designed to help practitioners, researchers, students, and other data users quickly gain access to relevant state and substate socioeconomic data. The site aims to be a convenient, comprehensive first stop for anyone searching among the vast, disparate array of public and private data sources on the Web. EconData.Net is sponsored by the Economic Development Administration as a service to regional data users, and is jointly operated by Impresa, Inc. and Andrew Reamer & Associates, independent economic development consulting firms. This is in [Business Resources 2004](#) and [Research Resources](#) Subject Tracer™ Information Blog. [Thanks to Gary Price [ResourceShelf](#) for reminding me of this excellent resource.]

A Home User's Security Checklist for Windows

<http://www.securityfocus.com/columnists/220>

Most people don't secure their computers or act in a secure manner, and the main reason is that the average user just doesn't know what to do. Here is a checklist on security for home computer users that you can share with your friends, family, churches and clubs. This has been added to [Security Resources 2004](#) Internet MiniGuide.

BlogDigger Groups

<http://www.blogdigger.com/groups/>

Blogdigger Groups allows you to create a "group blog", which is basically a directory of blogs on any topic you like. The feeds are aggregated, and an RSS feed of the content is made available. The group page allows filtering of the posts by feed or, if available, by subject/category. In addition, the members of the group are available in OPML and OCS. Once they get a larger number of groups (there's around 75 now), they are going to look into a meta-taxonomy that will organize the Groups into a directory. The application is in Beta now, available at the above URL.

Recall

<http://recall.archive.org/>

Recall is a search engine at the Internet Archive that indexes the text of over 11 Billion pages. The archive has pages dating way back to 1996 through the present day. A presentation about this technology can be [downloaded](#). This will be added to Search Engines chapter in [Internet MiniGuides](#). [Thanks for this resource Sabrina [beSpecific](#) 3-15-04]

Onfolio

<http://www.onfolio.com>

Fully integrated with Microsoft Internet Explorer and Office, Onfolio has tools for capturing a wide range of content including links, text snippets, images, web pages, and documents. Onfolio lets you organize and find captured content quickly and easily. And with Onfolio, you can easily share your research in documents, presentations, emails, and research reports. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Fotosearch

<http://www.Fotosearch.com/>

Fotosearch Stock Photos allows users to search from more than fifty quality stock photography vendors at one site. They can also find clipart pictures, royalty-free illustrations, royalty-free motion stock video clips, royalty free vector maps, and background clip art imagery. Fotosearch Stock Photos is the #1 stock photography portal

as measured by [Alexa.com](http://www.alexa.com). This has been added to [ShoppingBots](#) Subject Tracer™ Information Blog.

Astronomy Picture of the Day

<http://antwarp.gsfc.nasa.gov/apod/astropix.html>

"Each day a different image or photograph of our fascinating universe is featured, along with a brief explanation written by a professional astronomer." An archive of daily images is also available, starting from June 1995. A glossary of astronomy terms is offered. Each day's photo caption includes keywords that link to older images from the archive with a similar subject. This is in [Astronomy Resources](#) 2004 Subject Tracer™ Information Blog.

UDEF - Universal Data Element Framework

<http://www.udef.org/>

UDEF - Universal Data Element Framework - e-Business, ebXML & Web Services: The Missing Semantic Link. The future of automated data, application and process integration: The Universal Data Element Framework (UDEF) is a cross-industry metadata identification strategy designed to facilitate convergence and interoperability among e-business and other standards. The objective of the UDEF is to provide a means of real-time identification for semantic equivalency, as an attribute to data elements within e-business document and integration formats. There is a distinction to be made between the document standards, core components, ontological and taxonomical efforts underway as a result of the wide ranging integration and application collaboration activities on the net: The UDEF seeks only be an attribute in the data element. There are no process, validation or handling requirements, it only seeks to communicate in a standard and repeatable way, the exact concept that the data element represents. There is very little about context, just enough to identify the data element exactly. The UDEF can be seen as the "Dewey Decimal System" across standards. This will be added to [Business Resources 2004](#) Internet MiniGuide and [eCommerce Resources](#) Subject Tracer™ Information Blog.

The Virtual Technical Reports Center

<http://www.lib.umd.edu/ENGIN/TechReports/Virtual-TechReports.html>

The Virtual Technical Report Center offers EPrints, Preprints, & Technical Reports on the Web. The Institutions listed here provide either full-text reports, or searchable extended abstracts of their technical reports on the World Wide Web. This site contains links to technical reports, preprints, reprints, dissertations, theses, and research reports of all kinds. Some metasites are listed by subject categories, as well as by institution. This site will be updated monthly. This will be added to [Academic Resources 2004](#) Internet MiniGuide.

April 2004 Zillman Column - Survey Resources on the Internet

http://virtualprivatelibrary.blogspot.com/Survey_Resources.pdf

<http://www.zillmancolumns.com/>

The April 2004 Zillman Column is now available and is titled **Survey Resources on the Internet**. This April 2004 column is a comprehensive listing of online survey resources currently available on the Internet. These include individual websites and sources that supply the latest technology and information about online surveys and how it relates to your business and/or association and the Internet. With a number of free web applications you can have your survey up and published in a matter of minutes! Learn what your constituents have to say and what they want! A must resource to stay ahead of the curve with the latest survey resources available over the Internet.

The Portal Factory

<http://iesl.mit.edu/>

The Portal Factory is a new platform based architecture for information products. It allows many different kinds of information systems to be deployed from a single code base. The Portal Factory Manager can manage 100's of portals across an enterprise. This results in considerable savings in maintaining portals. Each portal can take advantage of the central Web Services, such as Content Stores and Registration Services. The platform has its own development SDK that allows the end user to extend both the Web Services and the Web Component library that allows dynamic rendering of the UI. We provide templates for different types of portal ranging from Course Management to Knowledge Repositories and Grid Computing. Our architecture is .NET Web Services based and exposes its interfaces using WSDL and SOAP. We use WS-Security and other GXA standard protocols that allow easy extension. This will be added to [Education and Distance learning Resources 2004](#) Internet MiniGuide.

Interview: The Future of News - The Digital Information Librarian

http://www.masternewmedia.org/2004/03/24/the_future_of_news_the.htm

[Robin Hood](#) interviewed me on **The Future of News: The Digital Information Librarian** and the complete interview including my answer to his ten questions are now online at the above URL. Robin has an excellent site and is a tremendous resource of information on the Internet.

Awareness Watch™ Book Review

Agent-Mediated Knowledge Management - AMKM 2003, Revised and Invited Papers

<http://snipurl.com/5adh>

zillman@VirtualPrivateLibrary.com

© 2004 Marcus P. Zillman, M.S., A.M.H.A.

This book presents a coherent and well-balanced collection of revised papers focusing on agent-mediated knowledge management. Most of the papers are extended and improved versions of work presented at the Symposium on Agent-Mediated Knowledge Management, AMKM 2003, held during the AAAI Spring Symposium in Stanford, CA, USA in March 2003; also included are 3 special articles, including a detailed introduction to the topic by the volume editors. The 28 papers are organized in topical sections on collaboration and peer-to-peer support - agent-based community support - agent models for knowledge and organizations - context and personalization - ontologies and semantic Web - agents and knowledge engineering.

Written for: Researchers and professionals

Subject Tracer™ Information Blogs

Subject Tracer™ Information Blogs created and developed by the Virtual Private Library™ combine the best of the latest tools on the Internet. Using bots, blogs and news aggregators the Subject Tracer™ Information blogs generate RSS feeds with the latest sources to create a current information resource flow through niched subject tracers. I am proud to be the creator of the Internet's first Subject Tracer™ Information Blogs:
