Welcome to the V3N1 January 2005 issue of the Awareness Watch™ Newsletter. This newsletter is available as a complimentary subscription and will be issued monthly. Each newsletter will feature the following:

**Awareness Watch™ Featured Report**

**Awareness Watch™ Spotters**

**Awareness Watch™ Book Review**

**Subject Tracer™ Information Blogs**

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that “change” is the only thing that will remain constant!!

**Awareness Watch™ Featured Report**

This month’s featured report will be highlighting grant resources for current and competent information on discovering grant and grant information on the Internet. These internet grant resources are constantly updated with Subject Tracer™ bots at the following URLs:

[http://www.GrantResources.info/](http://www.GrantResources.info/)

Finding the appropriate grant resources on the Internet is one of the most important tasks a financial researcher can accomplish! This January 2005 Awareness Watch Featured Report list many of these resources along with a number of extremely comprehensive lists of grant sources. These resources are constantly being updated so it would be wise to bookmark this resource and return on a regular basis.

**Awareness Watch™ Spotters**

**CodeBreakers-Journal**  
http://www.codebreakers-journal.com/  
CodeBreakers-Journal publishes original research articles in all aspects of computational methods used in the working fields Algorithms, Virus-Research, Software-Protection and Reverse Code Engineering and Cryptanalysis as well as all other areas of security analysis. It offers the possibility to publish grey articles/papers too. They are publishing research articles after full peer review. All articles are published, without barriers to access, immediately upon acceptance. This has been added to Script Resources Subject Tracer™ Information Blog.

**Deal Coupon - Web Coupons from A - Z**  
http://www.DealCoupon.com/  
Bargain hunters can use this page to check out their favorite merchants, browse by category, or type in the coupon, product or vendor you're looking for and let their search engine do the work. They deliver the most recent and most popular coupons. This has been added to ShoppingBots Subject Tracer™ Information Blog.

**Archives Canada**  
http://www.archivescanada.ca/english/index.html  
In homes, schools and libraries across Canada, people are looking for evidence of what it means to be a Canadian. Archives Canada is a gateway to archival resources found in over 800 repositories across Canada--it's your gateway to Canada's collective memory! Archives Canada is an official archival portal maintained by the Canadian Council of Archives (CCA), and is a joint initiative of CCA, the Provincial – Territorial Archival Networks, and Library and Archives Canada. All archival descriptions and links contained in the searchable database are provided by provincial – territorial councils, their members, and Library and Archives Canada. This has been added to Reference Resources Subject Tracer™ Information Blog. This has been added to Research Resources Subject Tracer™ Information Blog.

**Archival Meta Index**  
http://www.tulane.edu/~lmiller/ArchivesResources.html
This service is an archival "meta index," or index of archival indexes. That is, from here they refer you to the major indexes, lists, and databases of archival resources. From them you can link to almost every archives and archival resource in the metaverse. For ease of organization, they have divided the resources into broad, general categories, but researchers should note that specific resources can apply to more than one general category. The categories correspond to the discussion of Internet archival resources in the Society of American Archivists workshop Cyberspace for Archivists. This has been added to Research Resources Subject Tracer™ Information Blog. This has been added to Reference Resources Subject Tracer™ Information Blog.

**The Digital Toolbox**  
[http://www.lib.calpoly.edu/toolbox/](http://www.lib.calpoly.edu/toolbox/)

The Digital Toolbox is designed to help you find tools and resources which will enable you to create digital content easier, faster, and smarter. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

**Codes of Ethics Online**  
[http://ethics.iit.edu/codes](http://ethics.iit.edu/codes)

Site presents codes of ethics of professional societies, corporations, government, and academic institutions, of the over 850 codes they have in their paper archive, who gave them permission to include their code. Earlier versions of codes of ethics of some organizations represented are available so researchers can study the development of codes. A literature review, an introduction to the codes, and a user guide are included. Searchable and also indexed by topic. This has been added to Research Resources Subject Tracer™ Information Blog. This has been added to Information Quality Resources Subject Tracer™ Information Blog.

**EpistemeLinks - Philosophy Resources**  

EpistemeLinks.com includes over 16,500 categorized links to philosophy resources on the Internet and has several additional features. Begin browsing the site by using the Philosophers or Topics links or by using one of the specific link category sections. As it is updated often, regular visitors would do well to find out what is new. This has been added to Research Resources Subject Tracer™ Information Blog.

**Government Resources on the Web - What's New**  
[http://www.lib.umich.edu/govdocs/whatsnew.html](http://www.lib.umich.edu/govdocs/whatsnew.html)

The University of Michigan Documents Center Government Resources on the Web - What's New Site. This site has the latest happenings and resources on what is new in
government resources and is updated on a very regular basis. This has been added to Research Resources Subject Tracer™ Information Blog and will be added to eCurrent Awareness 2005 Report.

**Reuters RSS Feeds**
http://snipurl.com/awot

**Scopus - World’s Largest Abstract Database of Scientific Literature**
http://www.scopus.com

Scopus is a single Abstract and Indexing (A&I) database, which covers 14,000 scientific, technical, medical and social sciences titles from 4,000 STM publishers. Also 167 million scientific web pages going back forty years. Scopus offers cross-discipline access to 27 million abstracts and citations, back to 1966, including cited references from 1996 onwards. Scopus is about making searching easier and research more efficient. Built over two years together with more than 300 researchers and librarians from 21 research institutions worldwide, Scopus allows researchers to focus on the outcomes of their research, rather than on operating the database to find the literature they need. This has been added to Research Resources Subject Tracer™ Information Blog and Academic Resources 2005 Internet MiniGuide.

**Koders**
http://www.koders.com/

Koders is a search engine for source code. It enables developers to easily search and browse source code in thousands of projects hosted at hundreds of open source repositories. This has been added to Script Resources Subject Tracer™ Information Blog.

**NextGRID: Architecture for Next Generation Grids**
http://www.nextgrid.org/

Grid computing is a new computing paradigm, which provides immense computing and knowledge capability on demand in the same way that electricity grid provides power. Grids are going to revolutionise computing as profoundly as e-mail and the Web revolutionised communications. Grids are now moving out of the laboratories, following
the route taken by e-mail and the Web, and are set to change the way business is structured and how people work, learn and indeed live. NextGRID is part of a major initiative to ensure that Europe is a world leader in this technology which is so vital to the new knowledge-based economy. This has been added to Grid Resources Subject Tracer™ Information Blog.

Medical Research Guide

Another good starting point for health care researchers and medical school students, with annotated resource guides and free access to articles from dozens of academic and professional journals. This has been added to Healthcare Resources Subject Tracer™ Information Blog and will be added to Healthcare Resources 2005 Internet MiniGuide.

Term Paper Research Guide

Get support for term paper and college essay research in the sciences, humanities, and the arts, with access to articles from leading academic journals, plus annotated web resources about popular topics. This has been added to Student Research Subject Tracer™ Information Blog.

Scholar's Guide to WWW
http://tigger.uic.edu/~rjensen/

A comprehensive guide to resources on the world wide web for scholars created by Richard Jensen and updated with monthly versions. This has been added to Research Resources Subject Tracer™ Information Blog. This has been added to Student Research Subject Tracer™ Information Blog.

OCLC Top 1000
http://www.oclc.org/research/top1000/default.htm

OCLC Research has compiled a list of the top 1000 titles owned by member libraries—the intellectual works that have been judged to be worth owning by the "purchase vote" of libraries around the globe. This has been added to Reference Resources Subject Tracer™ Information Blog.

ERS/USDA Briefing Rooms
http://www.ers.usda.gov/Briefing/

Economic Research Service (ERS) of the United States Department of Agriculture offers the economics of food, farming, natural resources and rural America through briefing rooms. Each Briefing Room offers an indepth discussion synthesizing ERS research and
the economic issues that frame the analysis. Also inside: recent ERS research developments, readings and data, questions and answers, and a collection of other ERS products and services addressing the issue. Briefing Rooms will continue to expand and evolve to reflect ongoing ERS research and current issues. This has been added to Agriculture Resources Subject Tracer™ Information Blog.

Marcus P. Zillman eProfile by Gerry McKiernan

Gerry McKiernan is pleased to announce the publication and availability of his latest eProfile in _Library Hi Tech News_ - "Z as in Zillman." "Z as in Zillman" is a descriptive review of the publications and (mostly free) information resources and services provided by Zillman:

WEB NET MUSEUM

The WEB NET MUSEUM is a dynamic museum with international vocation, of strictly private nature. It is intended to replace more traditional institutions to introduce and support artists, works, experiments and events, in connection with the new digital culture.

YACY Distributed Web Crawler

http://freshmeat.net/projects/yacyproxy/?branch_id=51198&release_id=179952

YACY is a distributed Web crawler and also a caching HTTP/HTTPS proxy. Pages that pass through the proxy are indexed and can be searched using a built-in HTTP server. YACY peers connect each other and form a P2P-based index exchange network based on distributed hash tables. Explicit web crawls can be done locally or collaboratively, forming a global search and distributed indexing engine for the Web. It also provides URL filtering with blacklist sharing among other proxy peers, individual Web/servlet page hosting, a file sharing zone, and a database engine. This has been added to the search engines section of the 2005 Internet MiniGuides.

NewJour - New Journals and Newsletters

http://gort.ucsd.edu/newjour/

NewJour is the place to announce your own (or to forward information about others') newly planned, newly issued, or revised ELECTRONIC NETWORKED journal or newsletter. It is specially dedicated for those who wish to share information in the planning, gleam-in-the-eye stage or at a more mature stage of publication development and availability. It is also the place to announce availability of paper journals and newsletters as they become available on -- move into -- electronic networks. Scholarly
discussion lists which regularly and continuously maintain supporting files of substantive articles or preprints may also be reported, for those journal-like sections. We hope that those who see announcements on Bitnet, Internet, Usenet or other media will forward them to NewJour, but this does run a significant risk of boring subscribers with a number of duplicate messages. Therefore, NewJour IS filtered through a moderator to eliminate this type of duplication. This has been added to Research Resources Subject Tracer™ Information Blog. This will be added to Academic Resources 2005 Internet MiniGuide.

**Business Sources On the Net**
http://www.bl.uk/collections/business/bislinks.html

The following sites have been identified as containing information of value to business researchers. Selection of the sites has been based on usability and relevance. The listing is selective, not extensive - sites have also been chosen to complement the hard copy and electronic information held in The British Library's science, technology and business collections. This has been added to Business Intelligence Resources Subject Tracer™ Information Blog. This will be added to Business Resources 2005 Internet MiniGuide.

**East & Southeast Asia: An Annotated Directory of Internet Resources**
http://newton.uor.edu/Departments&Programs/AsianStudiesDept/

This annotated directory serves as a window on the rich Internet resources for the political units of East Asia (China, Japan, Korea, Hong Kong, Taiwan, Macau, and Mongolia) and Southeast Asia (Brunei, Burma (Myanmar), Cambodia, Indonesia, Laos, Malaysia, the Philippines, Singapore, Thailand, and Vietnam). For both Asia in general and for the individual political units, resources are grouped by various political, social, cultural and economic categories and sub-categories. There are also lists of resources on Asian Americans, and on current hot topics. Emphasis is on non-commercial and high-quality resources. Members of the academic community may find the lists of educational and research resources for Asia, China, Japan, Korea, and Asian American Studies to be of special interest. This has been added to Research Resources Subject Tracer™ Information Blog. This will be added to International Trade Resources 2005 Internet MiniGuide.

**Electronic Journal of Biotechnology**
http://www.ejbiotechnology.info/

Electronic Journal of Biotechnology, is a free international scientific electronic journal, published only in electronic format, that publishes gratuitously papers from all areas related to Biotechnology. It covers from molecular biology and the chemistry of biological process to aquatic and earth environmental aspects, as well as computational applications, biotechnology industry, policy and ethical issues directly related to Biotechnology. This has been added to Biological Informatics Subject Tracer™ Information Blog.
SmartDig™ - Business For Sale Search Engine
http://www.smartdig.com/

SmartDig™ is an aggregator of businesses for sale on the Internet and the best source for finding the right business - locally and around the world. SmartDig™ indexes business for sale listings from business brokers, business owners, business for sale forums, as well as corporate and community sites. Their goal is to be the one-stop business for sale search engine portal by ensuring the best possible search experience for business buyers. This has been added to Business Intelligence Subject Tracer™ Information Blog and will be added to Business Resources 2005 Internet MiniGuide.

OpenSourceCMS - Try Before You Install
http://www.opensourcecms.com/

This site was created with one goal in mind. To give you the opportunity to "try out" some of the best php/mysql based free and open source software systems in the world. You are welcome to be the administrator of any site here, allowing you to decide which system best suits your needs. The administrator username and password is given for every system and each system is deleted and re-installed every two hours. This allows you to add and delete content, change the way things look, basically be the admin of any system here without fear of breaking anything. At the upper left hand side of your screen you will see a clock that is counting down. What it shows is how much time is left in this two hour demo window. Once the clock hits 00:00:00, opensourceCMS.com will shut down and the demos will be completely refreshed. This takes about 5 minutes, and afterwards opensourceCMS.com will re-activate and the demo's will appear as fresh installations ready to be

DigiCULT.Info Issue 9
http://www.digicult.info/pages/newsletter.php

DigiCULT announces the release of DigiCULT.Info Issue 9 A Newsletter on Digital Culture November 2004, ISSN 1609-3941. The acceptance of DigiCULT.Info as a voice for the sector is once again illustrated in this issue, not only in the large number of contributions received but also in the quality and diversity of themes presented. Some of the themes examined in this issue include: digital contextualisation for knowledge acquisition - reproducing Greek masks for performance - Austrian digital heritage - e-readiness check for small heritage institutions - news from DigiCULT's Regional Correspondents - examining technologies and cultural heritage - Te Ara digital encyclopedia - thoughts on born-digital art - DiVA academic archive - new guides on digitisation - DSpace in a university trial - event reports.

MedBioWorld™
http://www.sciencekomm.at/
With over 35,000 directory links, MedBioWorld™, a medical information division of Healthnostics, Inc., is the largest medical and bioscience reference and resource directory on the Internet. The site is currently ranked #1 for medical and bioscience directories by Google™, with links to 8,200 journals within 80 medical and bioscience specialties; the home pages of 7,000 medical and bioscience associations; and links to over 2,000 bioscience companies. Other research and reference tools include dictionaries and glossaries, search engines, disease databases, clinical trials, medical guidelines, education and training, and medical journal full-text articles and abstracts. This has been added to Healthcare Resources Subject Tracer™ Information Blog, Biological Informatics Subject Tracer™ Information Blog and will be added to Healthcare Resources 2005 Internet MiniGuide.

Blog Tops U.S. Dictionary's Words of the Year by Greg Fros

A four-letter term that came to symbolize the difference between old and new media during this year's presidential campaign tops U.S. dictionary publisher Merriam-Webster's list of the 10 words of the year. Merriam-Webster Inc. said on Tuesday that blog, defined as "a Web site that contains an online personal journal with reflections, comments and often hyperlinks," was one of the most looked-up words on its Internet sites this year. This has been added to my Bots, Blogs and News Aggregators presentation site.

LexisNexis AlaCarte
http://alacarte.lexisnexis.com/

This is a new service offered from NexisLexis called LexisNexis AlaCarte. Tabs include: Search News, Business Research, Legal, Business Public Records, Hots Topics and Search Additional Sources. Example would be need the latest news on your topic? Search more than 6,000 of the world's leading news sources from the past 2 years. $3/each. Know your source? Click the Search Additional Sources tab to select from more than 20,000 sources and 2.8 billion documents dating as far back as 1968. This has been added to Research Resources Subject Tracer™ Information Blog. This has been added to Business Intelligence Resources Subject Tracer™ Information Blog. This will be added to Business Resources 2005 Internet MiniGuide.

Money Science Financial Intelligence Network
http://www.moneyscience.org/

An open-access resource for academics and practitioners working in finance and economics, physics, applied mathematics and computing. We aim to provide the single most comprehensive aggregated source for information in the broad field of quantitative finance. This has been added to Financial Sources Subject Tracer™ Information Blog.
This has been added to Business Intelligence Resources Subject Tracer™ Information Blog.

**Einstein@Home**  

Einstein@home is a program that uses your computer's idle time to search for spinning neutron stars (also called pulsars) using data from the LIGO and GEO gravitational wave detectors. They plan to deploy a production version of Einstein@home around the end of 2004, as part of the American Physical Society's World Year of Physics 2005 activities. The first test of Einstein@home carries out a search for pulsars over the entire sky, using the ten most sensitive hours of data from LIGO's second science run, S2. This same data has already been analyzed using a very powerful dedicated supercomputing cluster (nothing significant was found). For their first test of Einstein@home, they are repeating this search with some small technical changes. This has been added to Grid Resources Subject Tracer™ Information Blog.

**BNET - Business White Papers, Webcasts and Case Studies**  

BNET is a rapidly growing business thought leadership directory. Our mission is to be the best source for busy leaders to find and share the tools that help them solve their most important business problems. BNET provides action-oriented knowledge and tools such as white papers, case studies, webcasts, audio conferences, book summaries, checklists, spreadsheets and other interactive content to help busy leaders solve important problems at work. BNET's audience is made up of managers, directors and senior executives representing a variety of business functions (i.e. Finance, Human Resources, Marketing, etc.) at the world's most successful companies. This has been added to Business Intelligence Resources Subject Tracer™ Information Blog. This will be added to Business Resources 2005 Internet MiniGuide.

**ThinkBot**  
[http://www.pmbrowser.info/thinkbot.htm](http://www.pmbrowser.info/thinkbot.htm)

ThinkBot is an easy way to find other people who are thinking about the same things as you. With a simple command, you can search Thinkbot's database of users and chat instantly to someone who shares your thoughts. This is an excellent example of combining traditional and high tech to create a neat collaboration of social interaction to possibly discover new knowledge or even better a new friend!! This will be added to my annotated white paper Online Social Networking.
Affero: Rating & Reputation Service for Online Volunteers
http://www.affero.com/

Affero hosts personal web pages for authors, whether they are bloggers, writers, publishers, community hosts or individual forum participants that describe why they care about certain issues, which causes or organizations they feel need support, and a secured payment mechanism to facilitate impulse gifts from patrons who the member may have inspired or assisted in time of need. Affero also provides a historical record of ratings for the authors and their patrons. Each members' user-history provides a record of their contributions as perceived by other community members, including their history of writing, volunteerism and patronage. The personal web pages each have a unique web address (URL) that members can attach to email signatures, blog entries, articles, bulletin boards or any other digital work. All Affero members build community reputations through various interactions. Over time, these reputations can help facilitate a better understanding of the impact of an authors works, and hopefully inspire more effective dialogue for members in new and existing communities.

Florida Virtual School
http://www.flvs.net/_florida_services/index_flsl.htm

Florida Virtual School, an internet-based public school, offers a rigorous online curriculum for middle and high school students. Their fully accredited, award-winning program serves thousands of students around the globe! Courses are highly interactive with certified instructors. Monthly progress reports are provided. Florida Virtual School provides free online classes and instruction to all public, private, and home school students in Florida. All you need is the right attitude and access to a computer with Internet services. If you live outside of Florida, classes are available on a license or tuition basis. This has been added to Education and Distance Learning Resources 2005 Internet MiniGuide.

Government Technology White Paper, Case Study and Webcast Library
http://library.govtech.net/data/web/gtech/gtech_index.jsp

Find the latest white papers, case studies, webcasts and product information to help you with your technical purchasing decisions. View the Daily Top 50 Reports for the most popular IT reports on technology products and services. This has been added to Research Resources Subject Tracer™ Information Blog.

Péter Jacsó reviews Google Scholar
http://www.galegroup.com/free_resources/reference/peter/dec.htm#googlescholar

An indepth review of Google's latest entry into the scholarly search field "Google Scholar" and is well worth the read if you have any interest in scholarly and academic search and research. Also if you have an interest in other scholar and academic search
entities visit my latest research white paper that lists over 150 academic and scholar search engines and sources and is available by clicking here.

International Journal of Technology and Human Interaction (IJTHI)
http://www.idea-group.com/journals/details.asp?id=4290

An increasing amount of research is being done in the area where technology and humans meet. The success or failure of technologies, the question whether technology helps humans to fulfill their goals or whether it hinders them is in most cases not a technical one. Even though this problem has been recognized in many academic disciplines that deal with technology, we are still far from being able to present a set of theories that would allow us to understand the interaction of technology and humans and to put it to practical use. The International Journal of Technology and Human Interaction (IJTHI) aims to provide a platform for leading research that addresses issues of human and technology interaction.

Accoona - Super Target Your Search
http://www.accoona.com/

Accoona provides a great interactive search experience to its users. The user is more involved in determining his/her search results by being able to highlight and emphasize selected key words. This revolutionary, Interactive Search Technology, combined with proprietary Artificial Intelligence Software that understands the meaning of words, delivers SuperTargeted™ Search results that significantly differentiates Accoona in the Search Industry. Accoona Artificial Intelligence now takes the Search Experience to the next level, by merging information from the Web and the Accoona Business Database in real time. For the first time on an Internet Search Platform, Accoona presents business web site content and its relevant business data in a complementary format. This new and just released search engine has the capability to become a true business search engine by combining web and real time business information. This has been added to Business Intelligence Resources Subject Tracer™ Information Blog and to Business Resources 2005 Internet MiniGuide.

eBiquity Research Group Blogger
http://ebiquity.umbc.edu/v2.1/blogger/

The eBiquity Group is a research organization that consists of faculty and students from the Department of Computer Science and Electrical Engineering (CSEE) of UMBC. Their research explores the interactions between mobile, pervasive computing, multi-agent systems and artificial intelligence, and e-services. Group members have research interests in the underlying areas, such as distributed systems, mobile networking and systems, data management for pervasive/mobile systems, ad-hoc networks, knowledge representation and reasoning, personalization, web/data-mining, multi-agent systems and security. Much of their research is driven by applications in the e-sevices area -- e-
commerce, m-commerce, home-automation, wireless web etc. Their research efforts are funded by corporate and government sponsors, that include NSF, DARPA, NASA, DoD, HPL, IBM and AetherSystems. They collaborate with colleagues in the industry, as well as other academic institutions in their research. This has been added to Data Mining Resources Subject Tracer™ Information Blog.

SpiderNevi - Medical Tutorial Search Engine
http://www.spidernevi.com/

SpiderNevi medical tutorial search engine project is a non commercial volunteer project started by a group of doctors from UK and India. Its main purpose is to provide a free human edited relevant tutorials directory to medical fraternity. All included links are reviewed by a volunteer team of doctors and medical students before inclusion in the SpiderNevi database. This has been added to Healthcare Resources Subject Tracer™ Information Blog.

Open Journal Systems (OJS)
http://pkp.ubc.ca/ojs/

Open Journal Systems (OJS) is a journal management and publishing system that has been developed by the Public Knowledge Project through its federally funded efforts to expand and improve access to research. OJS assists with every stage of the refereed publishing process, from submissions through to online publication and indexing. Through its management systems, its finely grained indexing of research, and the context it provides for research, OJS seeks to improve both the scholarly and public quality of refereed research. OJS is open source software made freely available to journals worldwide for the purpose of making open access publishing a viable option for more journals, as open access can increase a journal's readership as well as its contribution to the public good on a global scale (see PKP Publications). This has been added to Research Resources Subject Traver™ Information Blog.

CiteULike
http://www.citeulike.org/

CiteULike is a free service to help academics to share, store, and organise the academic papers they are reading. When you see a paper on the web that interests you, you can click one button and have it added to your personal library. CiteULike automatically extracts the citation details, so there's no need to type them in yourself. It all works from within your web browser. There's no need to install any special software. Because your library is stored on the server, you can access it from any computer. You can share your library with others, and find out who is reading the same papers as you. In turn, this can help you discover literature which is relevant to your field but you may not have known about. Only links to the papers are stored, the papers themselves stay in archives like JSTOR or PubMed. At the moment the database is dominated by biological and medical
papers, but there is no reason why, say, history or philosophy bibliographies should not be equally prevalent. The system currently supports: Association for Computing Machinery (ACM) portal, American Meteorological Society, arXiv.org e-Print archive, CiteSeer, IngentaConnect, JSTOR, MetaPress, PLoS Biology, PubMed, PubMed Central, ScienceDirect, but more systems will be supported soon. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Student Research Subject Tracer™ Information Blog.

Friendster, Eurekster Team Up for Personalized Search
http://searchenginewatch.com/searchday/article.php/3445791

Friendster has rolled out a new internet search service powered by Eurekster that taps into your online social network to personalize and enhance search results. The new service takes advantages of the preferences and interests of Friendster members and their friends to filter search results to more closely match personal interests than general web search engines. The service is powered by Eurekster, which uses the Yahoo web index and also includes Overture sponsored listings. Friendster.com is mentioned in my annotated internet miniguide white paper titled Online Social Networking that was just recently updated. It is available by clicking here.

The International Economics Network
http://www.internationaleconomics.net/

The International Economics Network is a collection of key resources for international economics, as well as other related disciplines, including, inter alia, global business and finance, international law, and international development. It was inspired by the absence of an annotated, selective international economics-specific portal, together with Jamus Jerome Lim's personal interest in the subject and a desire to make the existing body of working papers and news articles on international economics conveniently accessible to a wide audience. Hence the birth of the site. The site is constantly growing as resources are added on an almost daily basis - mostly in the News & Commentary and Research Papers sections. This has been added to Research Resources Subject Tracer™ Information Blog. This will be added to Business Resources 2005 Internet MiniGuide.

Harvard Business School Baker Library Business Research Guides
http://www.library.hbs.edu/guides/

Baker Library produces guides to help in the use of resources at Baker and beyond for business and career research. The list below includes guides to general business topics, information on specific industries and specific course support projects that may be helpful in other contexts. This has been added to Business Intelligence Resources Subject Tracer™ Information Blog and Research Resources Subject Tracer™ Information Blog. This will be added to Business Resources 2005 Internet MiniGuide.
Google Suggest
http://labs.google.com/suggest/

As you type into the search box, Google Suggest guesses what you're typing and offers suggestions in real time. This is similar to Google's "Did you mean?" feature that offers alternative spellings for your query after you search, except that it works in real time. For example, if you type "bass," Google Suggest might offer a list of refinements that include "bass fishing" or "bass guitar." Similarly, if you type in only part of a word, like "progr," Google Suggest might offer you refinements like "programming," "programming languages," "progesterone," or "progressive." You can choose one by scrolling up or down the list with the arrow keys or mouse. Their algorithms use a wide range of information to predict the queries users are most likely to want to see. For example, Google Suggest uses data about the overall popularity of various searches to help rank the refinements it offers. An example of this type of popularity information can be found in the Google Zeitgeist. Google Suggest does not base its suggestions on your personal search history. This has been added to the tool section of Research Resources Subject Tracer™ Information Blog and Student Research Subject Tracer™ Information Blog.

TrustWatch - Website Verification Service
http://www.trustwatch.com/

TrustWatch is a web site rating system that gives Internet users information on the security and trustworthiness of domains and web sites. Before you exchange sensitive information, such as a providing a credit card number, personal identification information or other confidential data, TrustWatch allows you to check that the site has been verified by a trusted third party and is using appropriate safeguarding measures. TrustWatch is a free, publicly-available utility that checks several sources and then reports back to the user a verification rating for that domain or web site. Based on a variety of factors, TrustWatch reports a rating very much like a credit bureau reports an individual's credit score. TrustWatch has been developed by GeoTrust, a leader in identity and trust services, and the world's second largest Certification Authority. GeoTrust's business is helping individuals and organizations obtain trusted digital identities - whether that's for a person, device or an application. This has been added to eCommerce Resources Subject Tracer™ Information Blog.

Forum Qualitative Social Research (FQS) - Online Gateway for Qualitative Research
http://www.qualitative-research.net/

FQS is a multilingual online journal for qualitative research. The main aim of FQS is to promote discussion and cooperation between qualitative researchers from different nations and social science disciplines (Anthropology, Communication, Criminology, Cultural Sciences, Education, Ethnology, History, Linguistics, Management Information Systems, Medicine, Nursing, Philosophy, Politics, Psychology, Social Work, Sociology).
The unique attributes of the Internet—speed, flexibility, interactivity—are employed to develop, in comparison to traditional print media, new discourse forms and standards for quality. It is an experimental project which means being an open project where FQS' content and formal design are developed together with all of its participants—readers, authors, editorial board members and editors alike. This has been added to Research Resources Subject Tracer™ Information Blog.

Open Acess 2004 Special Issue
http://snipurl.com/ba3p

The newest issue of Serials Review (vol. 30, no. 4) is devoted to open access. David Goodman was the special editor for this issue, which contains 12 major articles on the subject. Moreover, all of them are OA. Thanks and congratulations to David and to Serials Review. [ Peter Suber - Open Access News ]

UMKC Libs: Guide to Evaluating Resources on the WWW
http://www.umkc.edu/lib/Instruction/MNLsubjguides/webeval.htm

A very nice and succinct guide that easily spells out the requirements for evaluating resources on the world wide web that includes: 1) Traditional Standards for Print Resources, 2) Pitfalls of Web Resources, 3) Evaluating Web Sources, and 4) Other Guides to Web Evaluation. This has been added to Information Quality Resources Subject Tracer™ Information Blog.

IMSA Internet Search Wizard
http://21cif.imsa.edu/locate

The Illinois Mathematics and Science Academy (IMSA) 21St Century Information Fluency Team updates its Internet Search Wizard, featuring the nation's most popular search engine and new instructional enhancements. Their Internet search tool uses the Google Public Service Search to bring you results from today's most widely used search engine. But the real news are the instructional features that help you get the most out of advanced Internet searching. The new Wizard presents: 1) Common advanced search parameters with mouse-over explanations of what each parameter does and when you might use it, 2) Links to expanded explanations of search tips and recommended MicroModules for deep dives into concepts, and 3) A visual display of your custom search query. As you type in the advanced search boxes, the actual Google search formula is being created before your eyes! The new Search Wizard still delivers "one stop shopping" for searchers with tabs at the top of the page to help common search tasks such as Spell Check, Thesaurus Lookup, Evaluation Template, Citation Template, Internet Safety, FAQs and other Helpful Tips. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This will be added to the search engines section of all the 2005 Internet MiniGuides.
TEXT FILES Resource Site
http://www.TextFiles.com/directory/

This site offers a glimpse into the history of writers and artists bound by the 128 characters that the American Standard Code for Information Interchange (ASCII) allowed them. The focus is on mid-1980's textfiles and the world as it was then, but even these files are sometime retooled 1960s and 1970s works, and offshoots of this culture exist to this day. he files on TEXTFILES.COM are maintained by somewhat arbitrary guidelines, so if a file you're looking for is not in one section, try a few others. Files are often in the "8+3" format, but since they're coming from all sorts of sources, this isn't guaranteed. Our focus is on the years 1980-1995, but files from before and after sometime sneak in. This has been added to Reference Resources Subject Tracer™ Information Blog.

Research Buddy - Saves References To WebPages in Bibliographical Reference Form
http://researchbuddy.mozdev.org/

Research Buddy saves references to webpages in a bibliographical reference form. The extension is designed to be used in the following way: 1) The user finds a quote on a webpage and wants to reference the quote in his/her paper, 2) The user selects the text of this quote, and, in the right-click menu, selects "Research Buddy" (this step is optional: the page can be referenced without selected text), 3) The plugin opens the main Research Buddy dialog, which allows the user to select which research topic the page should be filed under, and 4) The user clicks on "Add to selected topic", and the reference is saved to the topic. Depending on the preferences, the page (and it's images) may be saved to the user's disk. Users can also add new topics, delete old topics, rename topics, and view the bibliography for a topic. The Research Buddy preferences allow the user to configure the behavior of the plugin. Preferences are stored in a file, so they persist between web sessions: a) Bibliography format string (defaults to a generic reference string, b) Root directory to store pages in (set to the mozilla profile directory by default), c) Save the html of the referenced page (this is useful for ensuring access to the content regardless of the availability of the website. on by default, d) Save the images on the referenced page (useful for pages where content is at least partially contained in images. off by default to save disk space), e) Many bibliography strings will require an "Author" field. Due to the difficulty of accurately finding the author of a given webpage, they decided that this task be left up to the user, and f) The citations are stored in xml format, and an html file is only generated when the user clicks on "View Topic". This has been added to the tool section of Research Resources Subject Tracer™ Information Blog and added to Student Resources Subject Tracer™ Information Blog.

Bibliomining Bibliography
http://biblio.syr.edu/bibliomining/articles/

The purpose of this bibliography is to collect the work published about the bibliomining
process in libraries. While there are many pieces on data mining, and bibliometrics, the focus on this bibliography are those projects which would be considered part of the bibliomining process. Sections include: 1) Introductions, 2) Specific Bibliomining Applications including a) Management and Decision-Making, b) Collection Development / Acquisitions, c) Reference and Reader's Advisory (Recommendations), d) User Studies, e) Digital Libraries, f) Bibliometrics, g) Data Warehousing, and h) Specific Technologies; and 3) Privacy Issues Sampling. This has been added to the articles section of Deep Web Research Subject Tracer™ Information Blog.

**wURLdBook Research - Personal Internet Intelligence**
http://www.wurldbook.com/

wURLdBook's mission is to help people stay connected to information on the Web. wURLdBook is a free web based information aggregator. wURLdBook offers you a new way to unobtrusively navigate, collect, categorize, annotate, clip, archive, find, publish RSS (including enclosures) and share information with others that is important to you on the web. Using wURLdBook's integrated RSS news aggregation technology you can keep up-to-date on your favorite blog, news feed or RSS search. You can also republish RSS content you find to redistribute to friends and colleagues. With wURLdBook you can capture, along with the web site location (URL), meta-information or "micro content" related to your favorite sites or archive whole news stories for later reference to search against. You can add attachments to your web references which is an auxiliary URL pointing to a file such as music files, pdf (e.g. manuals, documents), text or movies to have quick reference to them or publish them as RSS enclosures to share with others. To get you started, you can even import your existing bookmarks to kick-start your web reference collection. This has been added to the following Subject

**NetMiner - Social Network Analyzer**
http://www.netminer.com/

Its unique feature lies in the integration of standard and the latest social network analysis(SNA) methodology with modern graph drawing techniques in the spirit of exploratory data analysis(EDA). NetMiner also allows you to analyze your network data professionally and easily. It helps you to fast-detect underlying patterns and structures of the network. Cyram NetMiner can be used for general research and teaching in social networks. Also, it can be effectively applied to various business fields, where network-structural factors have great deal of influences on the performance: e.g. intra- and inter-organizational, financial, Web, criminal/intelligence, informetric, telecommunication, distribution, transportation networks. This will be added to my white paper miniguide Online Social Networking. This has been added to Social Informatics Subject Tracer™ Information Blog.

**EIN News - World News Media Monitoring**
http://www.einnews.com/
EINnews provides you access to breaking news that is organized within 260+ country, regional, U.S. States and specialized topic sections. EINnews content is derived from monitoring over 4,000 different online sources and is designed to save you money by reducing time needed for your online research. More than one million people turn to EINnews for breaking news each year. This will be added to eCurrent Awareness Resources 2005.

Time To Get Online - Simple Steps to Success on the Internet
http://www.timetogetonline.org/content/view/19/43/

The 150-page Time To Get Online materials are centered around the five essential "steps to success on the Internet". The first half of the materials is geared towards creating Internet-savvy activists. The second half will help them to become effective Internet champions, capable of leading their organizations through the challenging process of integrating the Internet into everything they do. The Appendices and accompanying CD-ROM (print version only) contain a wealth of additional resources for continued learning, freely distributable computer software and more. This has been added to Tutorial Resources Subject Tracer™ Information Blog.

del.icio.us - Social Bookmarks
http://del.icio.us/

del.icio.us is a social bookmarks manager. It allows you to easily add sites you like to your personal collection of links, to categorize those sites with keywords, and to share your collection not only between your own browsers and machines, but also with others. Once you've registered for the service, you add a simple bookmarklet to your browser. When you find a web page you'd like to add to your list, you simply select the del.icio.us bookmarklet, and you'll be prompted for a information about the page. You can add descriptive terms to group similar links together, modify the title of the page, and add extended notes for yourself or for others. You can access your list of links from any web browser. By default, your links are shown to you in reverse chronological order, with those you've added most recently at the top. In addition to viewing by date, you can also view all links in a specific category (you define your own categories as you add the links), or search your links for keywords. What makes del.icio.us a social system is its ability to let you see the links that others have collected, as well as showing you who else has bookmarked a specific site. You can also view the links collected by others, and subscribe to the links of people whose lists you find interesting. This has been added to the tool section of Research Resources Subject Tracer™ Information Blog.

Internet Reference Services Quarterly
http://digital.library.miami.edu/irsq/index.html

Internet Reference Services Quarterly, a journal of innovative information practice,
technologies, and resources, highlights theoretically informed research and practical applications of Internet-related information services, sources, and resources. By exploring current topics, addressing controversial issues, and examining contemporary practices, IRSQ provides a basis for understanding the Internet’s power and impact on librarianship.

**RSScache.com**

http://www.rsscache.com/

RSScache.com is the solution to RSS bandwidth over usage! It acts as an intelligent caching system between the readers and the Web sites’ feeds. Instead of accessing the feed directly on the Web site, the reader passes through our RSScache.com system. If the feed is not currently in our cache, we query the feed on the Web site. Once we have cached the feed, we won’t fetch it again on the Web site until a certain period of time (30 minutes). Readers that connect to RSScache.com to get the feed will only receive the news that they haven’t seen yet (the user is authenticated by its IP address or by a GUID). So, for example, if the Web site hasn’t published news for 3 hours, readers won’t receive any news it has already received during that period. This optimises the reader’s and web site’s bandwidth. And since no installation is required by both parties, our solution can be used in less than 10 seconds! This will be added to my Bots, Blogs and News Aggregators presentation.

**BlogPulse 2004 - The Blogosphere in 2004**

What do George Bush, singing llamas, comedian Jon Stewart and a blog called Boing Boing have in common? They were some of the most discussed people, features and trends in the blogging world in 2004. And today, Intelliseek's BlogPulse.com web site features an entirely new section that reviews, with charts, links and graphs, the most commonly cited and linked-to items in the Blogosphere in 2004. BlogPulse 2004 contains something for everyone -- politics, news, social trends, international topics, silly stuff and intriguing finds. The Year in Review neatly captures the major themes, ideas, people and events that bloggers were discussing and writing about in 2004. Some highlights: Bush was the most-cited personality, a singing llamas video was among the most forwarded "you gotta see this!" links, the transcript of Stewart's pointed pre-election appearance on CNN's "Crossfire" was the most-cited news story, and Boing Boing was the most-cited blog. That's just a smattering of what you'll find at the BlogPulse 2004 Year in Review. Don't miss the chart that plots out how the seven deadly sins fared in 2004, or which actors/actresses, movies, Amazon.com products and web sites received the most "buzz," or which news sources bloggers turned to the most to find out what's going on in the world. This has be added to my Bots, Blogs and News Aggregators presenation links.
The January 2005 Zillman Column is now available and is titled **World Wide Web Reference**. This January 2005 Zillman Column is a comprehensive list of world wide web references resources and sites available over the Internet. Download this excellent 16 page free .pdf (345KB) column today and begin using the many reference resources about the World Wide Web!

**Online Business Networks - Building Quality Business Relationships on the Internet**

Reach More of the Right People Faster with Less Effort. Business is under pressure now more than ever to do more with less — bigger, better, cheaper, faster. But at what cost? At the cost of human relationships? It doesn't have to be. The internet offers powerful tools to help you find the right people, connect with them, build trust and rapport, and collaborate with them quickly and cost-effectively. This is a good guide with some fine resources. This has been added to my white paper **Online Social Networking**. This has been added to **Social Informatics** Subject Tracer™ Information Blog.

**Awareness Watch™ Paper Review**

**Information Retrieval and the Semantic Web** by Tim Finin, James Mayfield, Clay Fink, Anupam Joshi, and R. Scott Cost

http://ebiquity.umbc.edu/v2.1/paper/html/id/185/

**Abstract:**

Information retrieval technology has been central to the success of the Web. For semantic web documents or annotations to have an impact, they will have to be compatible with IR technology. We discuss three approaches to using conventional IR systems with documents and annotations in semantic web languages. Each has been implemented. Conference on System Sciences.
