

Awareness Watch™ Newsletter

By Marcus P. Zillman, M.S., A.M.H.A.

<http://www.AwarenessWatch.com/>

V4N10

October 2006

Welcome to the V4N10 October 2006 issue of the **Awareness Watch™ Newsletter**. This newsletter is available as a complimentary subscription and will be issued monthly. Each newsletter will feature the following:

Awareness Watch™ Featured Report
Awareness Watch™ Spotters
Awareness Watch™ Book/Paper/Article Review
Subject Tracer™ Information Blogs

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that “change” is the only thing that will remain constant!!

Awareness Watch™ Featured Report

This month’s featured report will be highlighting **Financial Sources** on the Internet. These resources are constantly updated on the Financial Sources Subject Tracer™ Information Blog available at the following URL:

<http://www.FinancialSources.info/>

Finding the appropriate and critical financial sources on the Internet is one of the most important tasks a financial researcher and or lay person can accomplish and this October 2006 Awareness Watch Featured Report list many of these free and fee based resources for financial resources and sources available on the Internet. These resources are constantly being updated so it would be wise to bookmark the above identified URL and return on a regular basis.

Dive Into Accessibility

<http://diveintoaccessibility.org/>

This book answers two questions. The first question is "Why should I make my web site more accessible?" If you do not have a web site, this book is not for you. The second question is "How can I make my web site more accessible?" If you are not convinced by the first answer, you will not be interested in the second. This has been added to [Accessibility Resources](#) Subject Tracer™ Information Blog.

RedFlagDeals.com - Canadian Shopping

<http://www.redflagdeals.com/>

RedFlagDeals.com is Canada's largest bargain shopping community. They search the online stores and store flyers for the best prices, free stuff, and Canadian coupons. Whether you're shopping in Toronto, Vancouver, Montreal or elsewhere in Canada, you will find the best prices and coupons when shopping for everything from computers to clothing! This has been added to [ShoppingBots](#) Subject Tracer™ Information Blog.

Center for Alternative Technology

<http://www.cat.org.uk/>

They offer solutions to some of the most serious challenges facing our planet and the human race, such as climate change, pollution and the waste of precious resources. They demonstrate practical ways of addressing these problems. Leading by example, they aim to show that living more sustainably is not only easy to attain but can provide a better quality of life. Their Visitor Centre is open seven days a week. Interactive displays show global issues such as energy generation and transport, and practical, everyday solutions for everyone. CAT also runs a free information service, answering enquiries on a massive range of topics by phone, letter or email, five days a week. For bigger projects, there is also a consultancy service.

GetHuman Project

<http://gethuman.com/>

The gethuman project is a consumer movement to improve the quality of phone support in the US. This free website is run by volunteers and is powered by over one million consumers who demand high quality phone support from the companies that they use. They will soon publish a list of the best and worst mass-market consumer companies in the US based on how long it takes to get to a human on the phone and on the quality of support received. The most popular part of the gethuman website is the gethuman database of secret phone numbers and codes to get to a human when calling a company for customer service. This has been added to [Reference Resources](#) Subject Tracer™ Information Blog.

CrunchBoard - Job Board

<http://www.crunchboard.com/>

The CrunchBoard job board gives you access to millions of technology and business savvy readers of TechCrunch, MobileCrunch, CrunchGear and other top technology

Awareness Watch V4N10 October 2006 Newsletter

<http://www.AwarenessWatch.com/>

zillman@VirtualPrivateLibrary.com

© 2006 Marcus P. Zillman, M.S., A.M.H.A.

blogs. CrunchBoard is permanently linked from these sites. It's the electronic version of the ultimate insider's network. Use CrunchBoard to connect with the most dynamic programmers, designers, entrepreneurs, executives, venture capitalists and others who are deeply interested in the new web, and looking for their next career step. This has been added to [Employment Resources](#) Subject Tracer™ Information Blog.

Web Form Factory

<http://www.webformfactory.com/>

You've spent hours designing and implementing your form in PhotoShop, Illustrator, ImageReady, FreeHand, FireWorks, DreamWeaver (etc.) and it's shiny and looks gorgeous. But unless you send it to a developer or learn PHP, it will remain useless forever. Web Form Factory is an open source web form generator which automatically generates the necessary backend code to tie your form to a database. By generating the backend code for you, WFF saves you time... time you could spend doing more interesting stuff. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

FreeMarker - Template Engine

<http://freemarker.sourceforge.net/>

FreeMarker is a "template engine"; a generic tool to generate text output (anything from HTML to autogenerated source code) based on templates. It's a Java package, a class library for Java programmers. It's not an application for end-users in itself, but something that programmers can embed into their products. FreeMarker is designed to be practical for the generation of HTML Web pages, particularly by servlet-based applications following the MVC (Model View Controller) pattern. The idea behind using the MVC pattern for dynamic Web pages is that you separate the designers (HTML authors) from the programmers. Everybody works on what they are good at. Designers can change the appearance of a page without programmers having to change or recompile code, because the application logic (Java programs) and page design (FreeMarker templates) are separated. Templates do not become polluted with complex program fragments. This separation is useful even for projects where the programmer and the HTML page author is the same person, since it helps to keep the application clear and easily maintainable. Although FreeMarker has some programming capabilities, it is not a full-blown programming language like PHP. Instead, Java programs prepare the data to be displayed (like issue SQL queries), and FreeMarker just generates textual pages that display the prepared data using templates. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

FutureLab - A New Learning Landscape

<http://www.futurelab.org.uk/>

Futurelab is passionate about transforming the way people learn. Tapping into the huge potential offered by digital and other technologies, we are developing innovative learning resources and practices that support new approaches to education for the 21st century. Working in partnership with industry, policy and practice, Futurelab: 1) incubates new

Awareness Watch V4N10 October 2006 Newsletter

<http://www.AwarenessWatch.com/>

zillman@VirtualPrivateLibrary.com

© 2006 Marcus P. Zillman, M.S., A.M.H.A.

ideas, taking them from the lab to the classroom, 2) offers hard evidence and practical advice to support the design and use of innovative learning tools, 3) communicates the latest thinking and practice in educational, and 4) ICT provides the space for experimentation and the exchange of ideas between the creative, technology and education sectors. A not-for-profit organisation, Futurelab is committed to sharing the lessons learnt from their research and development in order to inform positive change to educational policy and practice. This will be added to [Education and Distance Learning Resources 2006](#) Internet MiniGuide.

PHP Security Consortium (PHPSC)

<http://phpsec.org/>

Founded in January 2005, the PHP Security Consortium (PHPSC) is an international group of PHP experts dedicated to promoting secure programming practices within the PHP community. Members of the PHPSC seek to educate PHP developers about security through a variety of resources, including documentation, tools, and standards. This will be added to [Security Resources 2006](#) Internet MiniGuide.

Trexy - Blaze Search Trails

<http://www.trexy.com/>

You don't use Trexy instead of Google. Trexy works with Google and lots of other engines as well. Trexy enables you to keep a track of your own trails and you can follow other trailblazers too. Interesting beta site and concept.....

Packetyzer

<http://www.networkchemistry.com/products/packetyzer.php>

Packetyzer provides a Windows user interface for the well known Ethereal packet capture and dissection library. Ethereal is used by network professionals around the world for troubleshooting, analysis, software and protocol development, and education. It has all of the standard features expected in a protocol analyzer, and several features not otherwise available. Network Chemistry has taken advantage of its open source license to add a Windows front end to extend its use. This has been added to [World Wide Web Reference Subject Tracer™](#) Information Blog.

Wireless Universal Resource File (WURF)

<http://wurfl.sourceforge.net/>

The WURFL is an XML configuration file which contains information about capabilities and features of several wireless devices. The main scope of the file is to collect as much information as they can about all the existing wireless devices that access WAP pages so that developers will be able to build better applications and better services for the users. This project is open-source and is intended for developers working with the WAP and Wireless. All the information listed here has been collected by many different people from many different countries. You are allowed to use WURFL in any of your applications, free or commercial. The only thing required is to make any modification to

zillman@VirtualPrivateLibrary.com

© 2006 Marcus P. Zillman, M.S., A.M.H.A.

this file public, following the original spirit and idea of the creators of this project. This will help WURFL to grow better and better every day.

Instructables - Step By Step Collaboration

<http://www.instructables.com/>

Instructables is a website brought to you by the partners at www.squid-labs.com. They make a lot of stuff, for business, and for pleasure. They have been looking for a long time for a convenient system for documenting their how-to projects, and the things they make, but it simply didn't exist. They decided they would have to develop it themselves, and here it is, it will evolve as they grow to meet their own rigorous demands, and those of their users. Principal in our demands is convenience - it should take less time to document a project than it did to build it. They have been thinking and working in this space indirectly for more than 5 years, following the developments in Open Source Software, blogs, wikis, and version control systems. This has been added to [Tutorial Resources](#) Subject Tracer™ Information Blog.

Zimbio - The People's Guide to the Web

<http://www.zimbio.com/>

Their network of public portals are designed to help people quickly get down the learning curve on any topic of interest by seeing what other people are reading, saying, and recommending about the topic. Public portals are interactive, dynamic websites that offer a range of features including group blogging, member photos, links to favorite websites, RSS headlines, tracking of search results, and discussion forums. People use public portals to: a) Get informed on a particular topic of interest by using the organization and recommendations of others who have already spent time and energy getting informed on the same topic, b) Stay up to speed by getting a quick snapshot of what and who has been happening in the news, in the blogs, and in the Zimbio community, and c) Share knowledge, ask questions, get answers, and connect with like-minded people. This has been added to [Directory Resources](#) Subject Tracer™ Information Blog.

CollectiveX - Stay In the Loop With Your Group

<http://www.collectivex.com/>

CollectiveX is a web-based service that enables members of organized groups — such as alumni associations, non-profits, membership and social groups — to maximize return on involvement through private, secure communication and social networking. CollectiveX was designed with simplicity and ease-of-use in mind. Features include: member profiles with objectives and key connections, group calendars, discussions, email blasts and file sharing. CollectiveX is intuitive — no instruction manual required — and will immediately empower your group members to: a) Share current business/personal objectives and key connections, b) Learn about the interests and backgrounds of other group members, c) Leverage shared expertise and insights to accomplish group goals, d) Coordinate calendars, discussions and files in a single, centralized location, and e) Communicate in a private, secure environment via discussions & email blasts. This has been added to [Social Informatics](#) Subject Tracer™ Information Blog.

Pligg Content Management System

<http://www.pligg.com/>

Pligg is Web 2.0 Content Management System (CMS) unlike any other existing CMS. Pligg's Web 2.0 user interface gives your visitors a reason to come back to your site by making them decide on the site's content and giving them the chance to social network. By giving users the ability to collaboratively submit and dismiss articles, you are offering an experience that users are happy to take part in on a daily basis. This has been added to [Social Informatics](#) Subject Tracer™ Information Blog.

DataparkSearch Engine

<http://www.dataparksearch.org/>

DataparkSearch Engine is a full-featured open sources web-based search engine released under the GNU General Public License and designed to organize search within a website, group of websites, intranet or local system. DataparkSearch consists of two parts. The first part is indexing mechanism (indexer). Indexer walks over html hypertext references and stores found words and new references into database. The second part is web CGI front-end to provide search using data collected by indexer.

Visual Complexity

<http://www.visualcomplexity.com/>

VisualComplexity.com intends to be a unified resource space for anyone interested in the visualization of complex networks. The project's main goal is to leverage a critical understanding of different visualization methods, across a series of disciplines, as diverse as Biology, Social Networks or the World Wide Web. This has been added to [Social Informatics](#) Subject Tracer™ Information Blog. This has been added to [Biological Informatics](#) Subject Tracer™ Information Blog. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Ulteo - Easy-To-Use Open-Source Computer Operating System

<http://www.ulteo.com/>

Ulteo is a concept created by Gaël Duval, who has been deeply involved in the Linux community for several years, as the creator of Mandrake Linux (now "Mandriva Linux"), and co-founder of MandrakeSoft (now "Mandriva"). Much more than a new technology, Ulteo is a new concept intended to empower people with a new and more simple way to use computers. More details of Ulteo's concept will be released along with the first beta of the software. Ulteo intends to contribute a portion of its profits to humanitarian and ecological organizations. They believe that every company which benefits from the market place should help fight against child malnutrition and current ecological disasters. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog. This has been added to [Manage Information Overload](#) Presentation Resources.

Sphere Blog Search Engine

<http://www.sphere.com/>

They bring you the good stuff — a very simple idea that takes some smarts to do right. Sphere's advanced search algorithm helps you discover high-quality, relevant, and timely blog posts that match what you're looking for. This has been added to the resource page of [Bots Blogs and News Aggregators](#).

ViewVC: Repository Browsing

<http://www.viewvc.org/>

ViewVC is a browser interface for CVS and Subversion version control repositories. It generates templated HTML to present navigable directory, revision, and change log listings. It can display specific versions of files as well as diffs between those versions. Basically, ViewVC provides the bulk of the report-like functionality you expect out of your version control tool, but much more prettily than the average textual command-line program output. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

Internet World States - Usage and Population Statistics

<http://www.internetworldstats.com/>

An International website featuring up to date free worldwide Internet Usage, the Population Statistics and Market Data, for over 233 countries and world regions. A useful resource for international market research, containing Internet statistics, broadband penetration, world population data and global trade information. Web site is updated frequently. This has been added to [Internet Demographics](#) Subject Tracer™ Information Blog. This has been added to [Statistics Resources](#) Subject Tracer™ Information Blog.

Universal Packing List (UPL)

<http://upl.codeq.info/>

The program generating your packing list is doing some of the decisions for you from knowing what kind of trip you are doing. No scuba diving? Leave the snorkel behind! Never warmer than +10 centigrade? Leave your shorts behind! But please make yourself a service and experiment a bit with the "List length" setting! It has these choices: a) All items, b) Most items, c) Just normal items, d) No unnecessary items, and e) Just critical items. "All items" will give you everything, including Hammock, Ice ax and Underwater scooter. The extreme at the other end, "Just critical items", will give you Passport, Credit Card, and not much else. The choices in between gives you something in between. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Research Guide on International Health Law By Chenglin Liu

http://www.nyulawglobal.org/globalex/international_health_law.htm

This just released Research Guide on International Health Law includes the following sections: a) Introduction, b) Institutions, c) Key Definitions, d) Basic Documents of International Health Law, e) Online Sources on Public Emergency Preparedness and

Commentful - Blog Comment Monitoring

<http://commentful.com/>

Commentful is a service that watches comments/follow-ups on Blog posts, Digg submissions, Flickr pictures, and many other types of content. When ever there is an update, such as a new follow-up or comment, Commentful notifies you instantly. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Business Intelligence](#) Subject Tracer™ Information Blog. This has been added to the [Bots Blogs and News Aggregators](#) presentation resources page.

BookMooch

<http://www.bookmooch.com/>

BookMooch is a community for exchanging used books. BookMooch lets you give away books you no longer need in exchange for books you really want. Every time you give someone a book, you earn a point and can get any book you want from anyone else at BookMooch. Once you've read a book, you can keep it forever or put it back into BookMooch for someone else, as you wish. There is no cost to join or use this web site ... your only cost is mailing your books to others. Points for entering books: you receive a tenth-of-a-point for every book you type into their system, and one point each time you give a book away. In order to keep receiving books, you need to give away at least one book for every two you receive.

Quantnotes.com - Derivatives Resources

<http://www.quantnotes.com/>

Quantnotes.com is a quantitative finance website that aims to provide you with quality articles and publications on some of the more exotic financial instruments - Derivatives. This has been added to [Financial Sources](#) Subject Tracer™ Information Blog.

ThisNext - Shopcasting Network

<http://www.thisnext.com/>

ThisNext is a shopcasting network where you can recommend, share and discover great products. ThisNext believes that better buying means better living. Great products can help us do, be and experience the things that make us happy. Our goal is to help people discover great and deeply gratifying products. Every product on ThisNext is picked by the ThisNext community (That means you!). You can organize your picks into product playlists we call shopcasts. Great shopcast lists can be about activities (like climbing or cooking) or things (like fashion or food). They can even be about lifestyles (like being green). Shopcast lists and picks are tagged and searchable on ThisNext for easy discovery by other people. When you make a shopcast list, you are letting the world know what you

think is great and worth spending hard-earned money to buy. You are answering the question "What do you use?" for people who share your interests and POV. People who like your taste can then find and track your personal shopcasts or they can follow the collective wisdom of crowds to discover what the community recommends. This has been added to [Social Informatics](#) Subject Tracer™ Information Blog. This has been added to [ShoppingBots](#) Subject Tracer™ Information Blog.

Protolize.org - Essential Web Tools In One Place

<http://www.protolize.org/>

This is a place where web designers and developers collaborate to create an ultimate collection of web-tools. Only the most useful and current tools will be considered to be on the list. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

EntrepreneurshipWeek USA

<http://www.entrepreneurshipweekusa.com/>

EntrepreneurshipWeek USA officially launched its nationwide promotional and advertising program today. The promotion will culminate in events across the United States during EntrepreneurshipWeek USA, Feb. 24 – March 3, 2007. Official events will be held in five U.S. cities and a number of other regional and local events will take place across the country. So far, national partners include The New York Times, Inc. magazine and the Kauffman Foundation. The goal of EntrepreneurshipWeek USA is to celebrate the spirit of innovation and entrepreneurial thinking and to encourage young people to consider entrepreneurship as part of their future. This has been added to [Entrepreneurial Resources](#) Subject Tracer™ Information Blog.

OpenSync Project

<http://www.opensync.org/>

OpenSync is a synchronization framework that is platform and distribution independent. It consists of several plugins that can be used to connect to devices, a powerful sync-engine and the framework itself. The synchronization framework is kept very flexible and is capable of synchronizing any type of data, including contacts, calendar, tasks, notes and files. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

Open Source Web Design (OSWD)

<http://www.oswd.org/>

To put it simply, Open Source Web Design is a collection of web designs submitted by the community that anyone can download free of charge! The Open Source Web Design project was founded in September, 2000 by Francis J. Skettino. The goal was to provide the Open Source community with quality web designs to help get people's projects on the web in a way that is both organized and good looking. From personal blogs to content managements systems to full fledged businesses, OSWD has been providing free web

designs to those who need them for years. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

TrackMeNot

<http://mrl.nyu.edu/~dhowe/TrackMeNot/>

TrackMeNot is a browser extension that protects web-searchers against surveillance and data-profiling. It does so not by means of concealment or encryption (i.e. covering one's trail), but instead, paradoxically, by the opposite strategy: noise and obfuscation. With TrackMeNot, actual web searches, lost in a cloud of false leads, are essentially hidden in plain view. User-installed TrackMeNot works with the Firefox Browser and popular search engines, e.g. AOL, Yahoo!, Google, and MSN. This has been added to [Privacy Resources](#) Subject Tracer™ Information Blog.

Doing Business Database - Benchmarking Business Regulations

<http://www.doingbusiness.org/>

The Doing Business database provides objective measures of business regulations and their enforcement. The Doing Business indicators are comparable across 155 economies. They indicate the regulatory costs of business and can be used to analyze specific regulations that enhance or constrain investment, productivity and growth. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog. This will be added to [Business Resources 2006](#) Internet MiniGuide.

DrugBank Database

<http://redpoll.pharmacy.ualberta.ca/drugbank/>

The DrugBank database is a unique bioinformatics and cheminformatics resource that combines detailed drug (i.e. chemical, pharmacological and pharmaceutical) data with comprehensive drug target (i.e. sequence, structure, and pathway) information. The database contains nearly 4300 drug entries including >1,000 FDA-approved small molecule drugs, 113 FDA-approved biotech (protein/peptide) drugs, 62 nutraceuticals and >3,000 experimental drugs. Additionally, more than 6,000 protein (i.e. drug target) sequences are linked to these drug entries. Each DrugCard entry contains more than 80 data fields with half of the information being devoted to drug/chemical data and the other half devoted to drug target or protein data. This has been added to [Biological Informatics](#) Subject Tracer™ Information Blog.

ToDo.txt - Managing Your To Do List Simply

<http://www.todotxt.com/>

Countless software applications and web sites were built to manage your to do list. But if you're comfortable at the command line and you don't want to depend on someone else's data format or someone else's server, there's an age-old method that's perfect for tracking your stuff: plain text. Keep on top of all your tasks and projects in a simple file called todo.txt. With a few helper scripts, you can slice, dice, sort, distribute, pipe and munge your lists any way you please. As it should be. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

YouOS - A Web OPerating System

<https://www.youos.com/>

YouOS is an experiment in a new kind of computing platform. Access from anywhere. Create a document at an office computer, drive home, continue right from where you left off. Built-in sharing. Instantly share music, documents and more with your friends and associates. An application community. Everyone from professional software engineers to high school age programmers can participate at no cost. Choose from a growing list of over 319 released applications developed by our users. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

BioWizard - The Biomedical Research Portal

<http://www.biowizard.com/>

BioWizard is a revolutionary, free-of-charge research portal designed by scientists for the entire life science community. Rank and Discuss any research publication in PubMed Wizard (over 16 million articles)! To view rankings and comments, just type your search in the box above, and click Go. They believe that scientific knowledge is dynamic and should be subject to discussion in an open forum. Their goal is to resolve vital deficiencies in how science information is accessed, reviewed, shared, and archived. This has been added to [Biological Informatics](#) Subject Tracer™ Information Blog.

Updated> Online Research Tools White Paper Link Compilation

<http://www.OnlineResearchTools.info/>

Physicians Committee for Responsible Medicine (PCRM)

<http://www.pcrm.org/>

Founded in 1985, the Physicians Committee for Responsible Medicine (PCRM) is a nonprofit organization that promotes preventive medicine, conducts clinical research, and encourages higher standards for ethics and effectiveness in research. This has been added to [Healthcare Resources 2006](#) Internet MiniGuide.

Gapminder - Visualize Human Development

<http://gapminder.org/>

Gapminder is a non-profit venture for development and provision of free software that visualise human development. This is done in collaboration with universities, UN organisations, public agencies and non-governmental organisations. Gapminder is a Foundation registered at Stockholm county administration board (Länstyrelsen) (reg. nr. 802424-7721). It was founded by Ola Rosling, Anna Rosling Rönnlund and Hans Rosling on 25 February 2005, in Stockholm. Gapminder Foundation will advance software development that have been done earlier by the non-profit company Gapminder Ltd. Funding has been and is mainly by grants from Sida for the Trendalyzer project. Being a producer of global public goods Gapminder benefit from free and creative inputs from pilot-testers and other end-users in many institutions and organisations.

Postgenomic - Life Science Blog Aggregator

<http://www.postgenomic.com/>

Postgenomic aggregates posts from life science blogs and then does useful and interesting things with that data. For example, it allows you to get an instant picture of which web sites are being heavily linked to by researchers in the medical sciences, or which papers are being cited or reviewed most often by bioinformaticians, or which buzzwords are being used the most frequently by evolutionary biologists. It's sort of like a hot papers meeting with the entire biomed blogging community. Postgenomic's primary purpose is to act as a central repository for reviews of scientific papers and for conference reports. You can help with this by adding some very simple semantic markup to your blog posts when you write a review of a paper. In this context a "review" isn't necessarily a particularly long or critical assessment of the paper (though it could be): it's simply any information that other researchers might find useful. This has been added to [Biological Informatics](#) Subject Tracer™ Information Blog.

Daikon Invariant Detector

<http://pag.csail.mit.edu/daikon/>

Daikon is an implementation of dynamic detection of likely invariants; that is, the Daikon invariant detector reports likely program invariants. An invariant is a property that holds at a certain point or points in a program; these are often seen in assert statements, documentation, and formal specifications. Invariants can be useful in program understanding and a host of other applications. Examples include “.field > abs(y)”; “y = 2*x+3”; “array a is sorted”; “for all list objects lst, lst.next.prev = lst”; “for all treenode objects n, n.left.value < null ==> p.content in myArray”; and many more. You can

Awareness Watch V4N10 October 2006 Newsletter

<http://www.AwarenessWatch.com/>

zillman@VirtualPrivateLibrary.com

© 2006 Marcus P. Zillman, M.S., A.M.H.A.

extend Daikon to add new properties (see Enhancing Daikon output). Dynamic invariant detection runs a program, observes the values that the program computes, and then reports properties that were true over the observed executions. Daikon can detect properties in C, C++, Java, Perl, and IOA programs; in spreadsheet files; and in other data sources. (Dynamic invariant detection is a machine learning technique that can be applied to arbitrary data.) It is easy to extend Daikon to other applications; as one example, an interface exists to the Java PathFinder model checker. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

Mathwords: Terms and Formulas from Beginning Algebra to Calculus

<http://www.mathwords.com/>

An interactive math dictionary with enough math words, math terms, math formulas, pictures, diagrams, tables, and examples to satisfy your inner math geek. This website is designed for math students who need an easy-to-use, easy-to-understand math resource all in one place. It is a comprehensive listing of formulas and definitions from beginning algebra to calculus. The explanations are readable for average math students, and over a thousand illustrations and examples are provided.

Toggl - Online Time Tracker

<http://www.toggl.com/>

Toggl is online time and meeting tracking software. It provides users with a secure and convenient way to track their individual and team work hours and meetings. With Toggl, there is no limit to the number of projects or users; this basic functionality is free. Users can invite as many people to Toggl as they wish with no charge. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Organisation for Economic Co-operation and Development (OECD)

<http://www.oecd.org/>

The OECD groups 30 member countries sharing a commitment to democratic government and the market economy. With active relationships with some 70 other countries, NGOs and civil society, it has a global reach. Best known for its publications and its statistics, its work covers economic and social issues from macroeconomics, to trade, education, development and science and innovation. The OECD plays a prominent role in fostering good governance in the public service and in corporate activity. It helps governments to ensure the responsiveness of key economic areas with sectoral monitoring. By deciphering emerging issues and identifying policies that work, it helps policy-makers adopt strategic orientations. It is well known for its individual country surveys and reviews. The OECD produces internationally agreed instruments, decisions and recommendations to promote rules of the game in areas where multilateral agreement is necessary for individual countries to make progress in a globalised economy. Sharing the benefits of growth is also crucial as shown in activities such as emerging economies, sustainable development, territorial economy and aid. This will be added to [Business Resources 2006](#) Internet MiniGuide.

Library of Economics and Liberty

<http://www.econlib.org/>

The Library of Economics and Liberty is dedicated to advancing the study of economics, markets, and liberty. It offers a unique combination of resources for students, teachers, researchers, and aficionados of economic thought. The website is provided by Liberty Fund, Inc., a private, educational foundation established to encourage the study of the ideal of a society of free and responsible individuals. The Foundation develops, supervises, and finances its own educational activities, with the goal of fostering discussion and thought on enduring topics pertaining to the creation and maintenance of such a society. The site features: a) Authoritative editions of classics in economics, and related works in history, political theory and philosophy; b) Featured columns and articles, including follow-up Letters to the Editor; c) Links to the most commonly-used economics data bases; d) Reading lists and annotated bibliographies organized by topic, for those looking for ideas for further readings; and e) Links to other sites of interest. This will be added to [Business Resources 2006](#) Internet MiniGuide.

TRIP Free Access Evidence-Based Medicine Database - Turning Research Into Practice

<http://www.tripdatabase.com/index.html>

TRIP Free Access Database is one of the Internet's leading resources for Evidence-Based Medicine. Allowing users to easily and rapidly identify the highest quality evidence from a wide range of sources. The TRIP Database began in 1997 as a result of the work of the founders (Jon Brassey and Dr Chris Price) in answering clinical questions. One of the remits of answering the clinical questions was to return them in a clinically relevant time frame. As well as being quick the clinical questions needed to be answered using the best available evidence. Therefore, to identify the best evidence involved moving from website to website in order to identify relevant material. If each site took 5 minutes to search and 12 websites were examined it added an hour to the search time. If all the content were searchable at one website it would significantly improve the search time. Initially, a manual search of each evidence-based site was undertaken with titles, URL and year of publication recorded in a spreadsheet. Shortly afterwards a chance conversation led to the spreadsheet being converted to a crude web-based search engine. Since then it has grown significantly in terms of ease of use, coverage and popularity. The aims of the TRIP Database have remained the same since 1997 - allow health professionals to easily find the highest-quality material available on the web. The TRIP Database is produced by TRIP Database Ltd (for more information on TRIP Database Ltd see below). The evolution of the TRIP Database has been guided by the desire to answer real clinical questions. TRIP Database Ltd's involvement in clinical question answering (for more information see TRIP Knowledge Services) has shown the type of material that is useful in answering genuine questions health professionals have. More recently the site has been externally evaluated by a team from the Centre for Evidence-Based Medicine (www.cebm.net) led by Professor Paul Glasziou. The findings of this report have been very useful in this latest site upgrade. For approximately 4 years the TRIP Database became a subscription service which ended in September 2006. This

allowed for a dramatic improvements in the site. However, it also significantly restricted use. This relative lack of use led to a degree of frustration (a great product being under-used) therefore a new business model was sought and found. The TRIP Database is now free access and truly a great resource to the Internet clinical research community! This has been added to [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Healthcare Resources 2006](#) Internet MiniGuide. This has been added to [Healthcare Resources](#) Subject Tracer™ Information Blog.

Google SketchUp

<http://sketchup.google.com/>

Google SketchUp (free) is an easy-to-learn 3D modeling program that enables you to explore the world in 3D. With just a few simple tools, you can create 3D models of houses, sheds, decks, home additions, woodworking projects - even space ships. And once you've built your models, you can place them in Google Earth, post them to the 3D Warehouse, or print hard copies. Google SketchUp is free for personal use. No registration is required. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

PhpDig.net - Web Spider and Search Engine

<http://www.phpdig.net/>

PhpDig is a web spider and search engine written in PHP, using a MySQL database and flat file support. PhpDig builds a glossary with words found in indexed pages. On a search query, it displays a result page containing the search keys, ranked by occurrence. This has been added to [Bot Resesearch](#) Subject Tracer™ Information Blog.

phpThumb() - The PHP Thumbnail Generator

<http://phthumb.sourceforge.net/>

phpThumb() uses the GD library to create thumbnails from images (JPEG, PNG, GIF, BMP, etc) on the fly. The output size is configurable (can be larger or smaller than the source), and the source may be the entire image or only a portion of the original image. True color and resampling is used if GD v2.0+ is available, otherwise paletted-color and nearest-neighbour resizing is used. ImageMagick is used wherever possible for speed. Basic functionality is available even if GD functions are not installed (as long as ImageMagick is installed). One demo file uses portions of Javascript API by James Austin. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Zapr - Really Simple Sharing

<http://www.zapr.net/index.aspx>

Zapr is an application which lets you create links to any files on your PC. You can then send these links to friends (via email or IM) and they can get the files directly from your computer via their browser. It's safe and secure. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Social Meter

<http://www.socialmeter.com/>

Social meter scans the major social websites to analyze a webpage's social popularity. Currently we scan Del.icio.us, Digg, Furl, Google, Jots, Linkroll, Netscape, Reddit, Shadows, Spurl, Technorati, and Yahoo My Web. This has been added to [Social Informatics](#) Subject Tracer™ Information Blog.

Consumating - A New Way To Find People

<http://www.consumating.com/>

Consumating is a new way to find and connect with people who share your hobbies and interests. What are you into? Books? Music? Videogames? Get started finding someone or sign up. This has been added to [Social Informatics](#) Subject Tracer™ Information Blog.

October 2006 Zillman Column - Privacy Resources On the Internet

<http://VirtualPrivateLibrary.BlogSpot.com/PrivacyResourcesOct06Column.pdf>

<http://www.zillmancolumns.com/>

The October 2006 Zillman Column is now available and is titled **Privacy Resources On the Internet**. This October 2006 column Privacy Resources On the Internet is a comprehensive list of privacy resources and sites on the Internet including associated and related online privacy sources. These resources and sources will help you to discover the many pathways available to you through the Internet for obtaining and locating the latest privacy resources and sources. Privacy will always remain an important issue in today's society and keeping up with the latest happenings and developments with regards to privacy is very important to all of us! Download this excellent 20 page free .pdf (539KB) column today and start your journey into online resources for privacy on the Internet!

MyStickies - Sticky Notes for the Web

<http://www.mystickies.com/>

To put it simply, MyStickies allows you to place little yellow squares of digital paper anywhere and everywhere you feel like in the whole wide web. Along with the ability to put sticky notes on webpages mystickies offers a powerful interface to browse, search, sort, edit and generally have a wonderful time with your sticky notes from any computer that has internet access. MyStickies is like bookmarks on steroids. While bookmarks store the title of a webpage and it's link, they do little to help you find what was important about the page and why exactly you chose to mark it. MyStickies solves this problem by giving you the power to mark up the page the way you like, and a tool to find notes easily and efficiently. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Pod2Mob - Mobile Podcasting

<http://www.pod2mob.com/>

Use Pod2Mob and you can listen to your favorite podcasts through your mobile phone. Pod2Mob is the world's first application that empowers you to browse and stream podcasts anywhere and everywhere over your wireless connection. The service has been

confirmed on SprintPCS, Cingular, and Verizon but should work on most cell phone providers. This has been added to [World Wide Web Reference](#) Subject Tracer& Information Blog.

BuzzLogic

<http://www.BuzzLogic.com/>

Influence moves markets. It's a basic tenet of marketing. But until now, it's been impossible to understand influence -- and who wields it -- within specific conversations taking place in social media. BuzzLogic changes this dynamic by uniquely defining and measuring influence in social media, and by surfacing the key influencers who are shaping and defining markets, issues and reputations. Through the lens of influence, BuzzLogic provides a means for marketing and communications practitioners to engage with social media in order to manage their brands, reputations, products and customer relationships. As a result, the confusion that has characterized social media is replaced by clarity -- marketers can make sense of the conversations they care about. And they can do something about them. At BuzzLogic, our mission is to apply the science of influence to the world of social media. This requires keen insight into dynamic conversational networks, a methodology premised on the idea that influence is in and of itself dynamic, and an ability to identify which participants in conversations are gaining or losing influence over time. This has been added to [Social Informatics](#) Subject Tracer™ Information Blog. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog.

Map of the Market

<http://www.smartmoney.com/marketmap/>

The map is a powerful new tool for spotting investment trends and opportunities. This quick-start guide will show you how to interpret the map, drill down for detailed information and customize your view. The map lets you watch more than 500 stocks at once, with data updated every 15 minutes. Each colored rectangle in the map represents an individual company. The rectangle's size reflects the company's market cap and the color shows price performance. (Green means the stock price is up; red means it's down. Dark colors are neutral). Move the mouse over a company rectangle and a little panel will pop up with more information. This has been added to [Financial Sources](#) Subject Tracer™ Information Blog. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog.

Awareness Watch™ Paper Review

Who supports Internet censorship? by Craig A. Depken, II
http://www.firstmonday.org/issues/issue11_9/depken/index.html

Abstract:

Censorship is the moral or legislative process by which society “agrees” to limit what an individual can do, say, think, or see. Recent attempts to regulate, *i.e.*, censor, what is viewed on the Internet have polarized the general population. Unfortunately, beyond the anecdotal, the characteristics of those who support Internet censorship are unknown. In this study, the support for Internet censorship is empirically analyzed using survey data. Notwithstanding the potential limitations of survey data, the results indicate the characteristics of those who tend to favor and disfavor Internet censorship. Specifically, concerns over pornography and concerns over government regulation on the Internet

Subject Tracer™ Information Blogs

Subject Tracer™ Information Blogs created and developed by the Virtual Private Library™ combine the best of the latest tools on the Internet. Using bots, blogs and news aggregators the Subject Tracer™ Information blogs generate RSS feeds with the latest sources to create a current information resource flow through niched subject tracers. I am proud to be the creator of the Internet’s first Subject Tracer™ Information Blogs:
