

Healthcare Bots and Subject Directories

By

Marcus P. Zillman, M.S., A.M.H.A.
Executive Director – Virtual Private Library

This white paper link compilation is designed to give you the latest resources available to find selected and niched information in the healthcare field for healthcare research both professional and personal. It is divided into two categories: a) Search Engines and Selected Bots, and b) Directories, Subject Trees and Subject Tracers. These resources allow you to begin your research using the latest sources that are available on the Internet. Using both bots and subject directories to initialize your healthcare research allows one to create a broad spectrum approach to the information available.

These resources allow one to discover both the latest and archival healthcare information that is available on the Internet. Performing both personal and professional healthcare research requires both timely and established information sources that this listing provides. Once you have determined the appropriate resource you will then be able to create an information trap that will constantly be monitoring for the keyword and phrases of your healthcare research query. These results then can be sent to you either via eMail or via a RSS/ATOM feed. The key here is that the competitive intelligence query will be ongoing from your selected resource and updated when new information is discovered.

Subject Tracer™ Information Blogs

Subject Tracer™ Information Blogs created and developed by the Virtual Private Library™ combine the best of the latest tools on the Internet. Using bots, blogs and news aggregators the Subject Tracer™ Information blogs generate RSS feeds with the latest resources to create a current information resource flow through niched subject tracers. I am proud to be the creator of the Internet's first Subject Tracer™ Information Blogs:
